South Africa Liesel Hibbert,Christa van der Walt,2014-04-03 Focusing on the use of African languages in higher education this book showcases South African higher education practitioners attempts to promote a multilingual ethos in their classes It is a first time overview of multilingual teaching and learning strategies that have been tried and tested in a number of higher education institutions in South Africa Despite language in education policies that extol the virtues of multilingualism practice remains oriented towards English only learning and teaching In the multilingual contexts of local campuses this book shows how students and lecturers attempt to understand their multiple identities and use the available languages to create multilingual learning environments Multilingualism in Mathematics Education in Africa Anthony A. Essien,2023-12-14

This book brings together the first book collection of African research in mathematics education in multilingual societies and chronicles current research in different linguistic contexts across the African continent including Algeria Namibia Malawi Morocco Rwanda South Africa on issues of multilingualism in mathematics education but more importantly it foregrounds pertinent issues for future research With many of the authors building on earlier path breaking African research the book is a unique contribution of careful thinking through how linguistic diversity and multilingualism manifest in ways that differ from one geopolitical context to another This volume is an important contribution to the growing recognition of multilingualism as the global linguistic dispensation in mathematics education It is an invitation to how we might as an international community where more and more multilingualism is the norm rather than an exception pay more attention to the multilingual agency and capabilities of both students and teachers in order to better harness the epistemic potential of multiple languages in contexts of language diversity in mathematics education *Knowledge Beyond Colour Lines* Monwabisi K.

Ralarala,Salochana Lorraine Hassan,Rajani Naidoo,2021-05-25 Knowledge remains timely in education The need for academics to contemplate its relevance worth use and everything in between deems a continuous intellectual project rather than a conundrum to be solved This book takes the South African context by the horns as it challenges the often dormant and traditionalist ways in which higher education spaces see knowledge Through original research and the voices of academics and students this book argues for repurposing knowledge generation knowledge sharing and critical pedagogy so that more inclusive teaching and learning environments can be both imagined and sustained The contentious tensionalities that this creates for LoLT and SoTL in particular are unlocked so as to trouble the South African higher education landscape with the intent to proffer alternative pathways for a knowledge beyond colour lines Prof Shan Simmonds PhD NWU This edited volume bristles with fresh scholarly approaches and insights of an emergent generation of engaged scholars grappling with the issues and problems of higher education in South Africa The issues dealt with here are varied and encompassing They are

treated with intellectual delicacy and probing sensitivity articulacy informed data and bold conclusions They serve well Prof Kwesi Kwaa Prah Emeritus Professor of Sociology University of the Western Cape Founder of the Centre for Advanced Studies of African Society English as a Language of Learning, Teaching and Inclusivity Liesel Hibbert, 2023-08-18 Hibbert explores South Africa's higher education crisis utilising case studies and first hand experiences with English as the language of instruction The historical overview provides a framework with which to understand the complicated nature of using English as a language of instruction in South Africa past and present Student narratives are presented to illustrate mainly breakthroughs but also challenges An overview is provided of imported English teaching methodologies and how they have emerged and developed in the local educational system over decades It is demonstrated how these methodologies relate to socio economic and political events and trends at each juncture By applying defamiliarisation as a research method of investigation students translanguaging struggles are recorded and discussed both pre pandemic and in the pandemic period The experiences of non monolingual English speaking staff and students and of local English African language bilinguals is foregrounded as they are by far the majority in South African higher education and schools The relevance of the experiences and learning paths of those staff and students is enhanced This book aids lecturers across disciplines and English language facilitators in the improvement of English acquisition curricula through exposure to arguments case studies and learning path narratives in this volume and prompts and inspires researchers to develop further theories and experiments in their own context Southern African Linguistics and Applied Language Studies ,2008 Study SA ,2006 G.K.
