Tests Richard C. Sweetland,1991 Revises the information in the second edition and presents over 700 new or revised tests The Psychology section contains 20 subsections Education has 54 subsections and Business has 13 subsections Does not contain reliability validity and normative data Use the complementary Test Critiques series for this information Cognition and Conditionals Mike Oaksford,Nick Chater,2010 The conditional if then is probably the most important term in natural language and forms the core of systems of logic and mental representation Cognition and Conditionals is the first volume for over 20 years that brings together recent developments in the cognitive science and psychology of conditional reasoning

Differential Item Functioning Paul W. Holland,Howard Wainer,2012-08-06 Test fairness is a moral imperative for both the makers and the users of tests This book focuses on methods for detecting test items that function differently for different groups of examinees and on using this information to improve tests Of interest to all testing and measurement specialists it examines modern techniques used routinely to insure test fairness Three of these relevant to the book s contents are detailed reviews of test items by subject matter experts and members of the major subgroups in society gender ethnic and linguistic that will be represented in the examinee population comparisons of the predictive validity of the test done separately for each one of the major subgroups of examinees extensive statistical analyses of the relative performance of major subgroups of examinees on individual test items **Gender and Fair Assessment** Warren W. Willingham,Nancy S. Cole,2013-12-16

There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience Resources in
