T 38 Flight Operations Manual:

T-38 Talon Pilot's Flight Operating Instructions United States Air Force, 2009-02-01 Northrop's T 38 Talon was the world's first supersonic trainer aircraft and remains in service today in air forces worldwide. It entered service in 1961 and quickly set climb records earning it the nickname white rocket. Nearly 1200 Talons were produced before the last one rolled off the assembly line in 1972. Capable of a speed of Mach 1.3 and a climb rate approaching 34,000 feet per minute, the T 38's performance was sufficient to warrant service as the USAF Thunderbirds aircraft in the mid 1970s. Its primary role, however, was as a dedicated training and proficiency platform. More than 50,000 USAF, NASA, and NATO pilots have flown the Talon, a record that may never be matched. Originally printed by the U.S. Air Force and Northrop, this handbook for the T 38 provides a fascinating glimpse inside the cockpit of this famous aircraft. Originally classified restricted, the manual was recently declassified and is here reprinted in book form. Assistant Secretary of Defense (Public Affairs), 1984. **SR-71** Richard H. Graham, 2013-04-09. A pictorial history of the legendary Lockheed spy plane, written by one of its pilots and filled to the brim with information and revelation. Seattle Post-Intelligencer Travel for Aircraft blog. At the height of the Cold War in 1964, President Johnson announced a new aircraft dedicated to strategic reconnaissance. The Lockheed SR 71 Blackbird spy plane flew more than three and a half times the speed of sound so fast that no other aircraft could catch it. Above 80,000 feet, its pilots had to wear full pressure flight suits similar to what was used aboard the space shuttle. Developed by the renowned Lockheed Skunk Works, the SR 71 was an awesome aircraft in every respect and it took the world by storm. The SR 71 was in service with the US Air Force from 1964 to 1998 when it was withdrawn from use, superseded by satellite technology. Twelve of the thirty-two aircraft were destroyed in accidents, but none were ever lost to enemy action. Throughout its thirty-four year career, the SR 71 was the world's fastest and highest flying operational manned aircraft. It set world records for altitude and speed: an absolute altitude record of 85,069 feet on July 28, 1974, and an absolute speed record of 2,193.2 miles per hour on

the same day On September 1 1974 it set a speed and time record over a recognized course between New York and London 3 508 miles of 1 435 587 miles per hour and an elapsed time of 1 hour 54 minutes 56 4 seconds SR 71 covers every aspect of the plane s development manufacture modification and active service from the insider s perspective of one its pilots and is lavishly illustrated with more than 200 photos Pilot's Radio Communications Handbook Sixth Edition Paul E.
