The 2014 Long Rains Season Assessment Report Kenya Food Security Steering Group, 2014 *Polymer-Silica Based Composites in Sustainable Construction* Harrison Shagwira, Fredrick Madaraka Mwema, Thomas Ochuku Mbuya, 2021-12-26

This book presents the application of Polymer Silica Based Composites in the Construction Industry providing the fundamental framework and knowledge needed for the sustainable and efficient use of these composites as building and structural materials. It also includes characterization of prepared materials to ascertain mechanical, chemical, and physical properties and analyses results obtained using similar methods. Topics such as life cycle analysis of plastics, application of plastics in construction, and elimination of plastic wastes are also discussed. The book also provides information on the outlook and competitiveness of emerging composites materials. Covers theory, preparation, and characterizations of polymer silica based composites for green construction. Discusses technology, reliability, manufacturing cost, and environmental impact. Reviews the classification, application, and processing of polymer silica composites. Gives a deeper analysis on the various tests carried out on polymer silica composite. Highlights role of such composites in the Industry 4.0 and emerging technologies. This book is aimed at graduate students and researchers in civil engineering, built environment, construction materials, and materials science.

Digital finance and agri-food value chains: Case studies from Kenya Wairimu, Edith, 2025-07-09

Kenya's agrifood systems are broad and diverse, including both staple food crops and high value exports which are essential to the economic and social advancement of the nation. The agricultural sector employs more than 40 percent of Kenya's workforce, including more than 70 percent of rural residents, and accounts for about 33 percent of the country's GDP. FAO 2023a, FAO n.d. The growth of Kenya's agrifood system is largely driven by domestic market demand rather than exports, a trend driven by rapid urbanization and rising income opportunities in the rural nonfarm sector which are leading to shifts in dietary preferences and are expected to further influence ongoing structural transformation. Diao et al 2023. Kenya's agricultural sector is characterized by several value chains that significantly support economic output, job creation, and trade. Tea is Kenya's most significant agricultural export, contributing about 2 percent to the overall GDP and 4 percent to GDP in agriculture. Managed predominantly by the Kenya Tea Development Agency (KTDA) which oversees over 60 percent of national tea production, the sector supports approximately 6.5 million people. Tea Board of Kenya 2024. Tea also contributes around 21 percent of Kenya's export earnings, which makes it the third largest source of foreign exchange earnings in the nation, after diaspora remittances and tourism. Kilimo News 2024.
