The World Health Report 2002:

The World Health Report 2002 World Health Organization,2002 The world is living dangerously either because it has little choice or because it is making the wrong choices Dr Gro Harlem Brundtland WHO Director General *The World Health Report 2002* Organización Mundial de la Salud,2002 The report describes the amount of disease disability and death in the world today that can be attributed to a selected number of the most important risks to human health and also calculates how much of this present burden could be avoided in the next couple of decades if the same risk factors were reduced It shows how some of those possible reductions can be achieved in a range of cost effective ways P xiii **The**

World Health Report 2003 World Health Organization,2003 We have a real opportunity now to make progress that will mean longer healthier lives for millions of people The World Health Organization between North and South Nitsan Chorev,2012-05-15 Since 1948 the World Health Organization WHO has launched numerous programs aimed at improving health conditions around the globe ranging from efforts to eradicate smallpox to education programs about the health risks of smoking In setting global health priorities and carrying out initiatives the WHO bureaucracy has faced the challenge of reconciling the preferences of a small minority of wealthy nations who fund the organization with the demands of poorer member countries who hold the majority of votes In *The World Health Organization between North and South* Nitsan Chorev shows how the WHO bureaucracy has succeeded not only in avoiding having its agenda co opted by either coalition of member states but also in reaching a consensus that fit the bureaucracy s own principles and interests Chorev assesses the response of the WHO bureaucracy to member state pressure in two particularly contentious moments when during the 1970s and early 1980s developing countries forcefully called for a more equal international economic order and when in the 1990s the United States and other wealthy countries demanded international organizations adopt neoliberal economic reforms In analyzing these two periods Chorev demonstrates how strategic maneuvering made it possible for a vulnerable bureaucracy to preserve a relatively autonomous agenda promote a consistent set of values and protect its interests in the face of challenges from developing and developed countries alike **The World Health Report 2007** World Health

Organization,2007 **World Health Report 2007** discusses the challenges to global health security by the increasing and constant movement around the world of people and products It looks at the potential of new tools for collective defence particularly the revised International Health Regulations 2005 which came into force this year Significantly the revised Regulations move away from a focus on passive barriers at airports seaports and borders to a strategy of proactive risk management detecting an event early and stopping it at its source before it has a chance to become an international threat

The World Health Report 2008 World Health Organization,2008 Provides information on medical care and health care policy from around the world Inheriting the World Bruce Allan Gordon,Richard Mackay,Eva Rehfuess,World Health Organization,2004 Highly commended in the Public Health Category of the British Medical Association Book Competition

2005 Every child has the right to live in a healthy supportive environment an environment that encourages growth and development and protects from disease Many of the world s children however are exposed to hazards in the very places that should be safest the home school and community Considering that their growing bodies are particularly sensitive to environmental threats the final burden of childhood disease is substantial Every year more than three million children die due to unhealthy environments This atlas articulates where and why more than three million children die every year due to unhealthy environments It tackles issues as diverse as the devastating and largely unknown impact of indoor air pollution the unfashionable tragedy of sanitation and complex emerging issues like climate change Full color maps and graphics clearly demonstrate the threats that children face everywhere and underscore the impact of poverty on children s health While this crisis cannot be ignored and demands urgent action success stories such as the Montreal Protocol show a way forward for the world to make sure that our children will inherit a safer planet and a brighter future *Oxford Handbook of Public Health Practice* David Pencheon,2006 This is a practical public health book written by public health practitioners for public health practitioners It introduces learning practitioners to the early phases of approaching a public health issue details why an issue is important and exactly how it can be analysed and addressed It deals not only with the technical issues but crucially with how those technical issues can be implemented in order to improve the health of the population directly or via one of many important causal pathways quality of health care design and delivery It is written by experienced internationally known practitioners of public health **Mental Health Policy And Practice Across Europe** Knapp, Martin,McDaid, David,Mossialos, Elias,2006-12-01 This book maps the current state of policy service provision and funding for mental health care across Europe taking into account the differing historical contexts that have shaped both the development and the delivery of services Clinical Men's Health Joel J. Heidelbaugh,E. Jauniaux,Mark B. Landon,2007-01-01 This text provides a biopsychosocial approach to diseases and disorders of male patients from birth through late adulthood Replete with current evidence based guidelines to facilitate clinical decision making the framework of each chapter builds upon epidemiological data centered on men *Health Services Reports* ,2004 Global Health Watch 2005-2006 ,2005 This alternative world health report offers a comprehensive survey of the key areas that influence the health of poor and vulnerable groups in all countries They range from climate change water and nutrition to national health policies and services andthe brain drain of health professionals from South to North **World in Transition** Wissenschaftlicher Beirat der Bundesregierung Globale Umweltveränderungen (Germany),2004 For policymakers p 1 **World in Transition 3** German Advisory Council On Global Change (Wbgu),2014-04-08 The publication of World in Transition Towards Sustainable Energy Systems is timely indeed The World Summit on Sustainable Development gave great prominence to this challenge but failed to agree on a quantitative time bound target for the introduction of renewable energy sources The German Advisory Council on Global Change WBGU has now produced a report with a global focus which is essential in view of the global impacts of climate

change The report provides a convincing long term analysis which is also essential Global energy policies have to take a long term perspective over the next 50 to 100 years while providing concrete guidance for decision makers to implement now There is an urgent need to secure energy supplies for the 2 4 billion people who still depend upon traditional biomass while avoiding dangerous climatic changes Our one world must close the gap between industrialized countries surfeit and developing countries poverty Policies will need to consider both the broader environmental and specific climate constraints I recommend this book very warmly to everyone concerned with global energy issues Klaus Topfer Executive Director United Nations Environment Programme World in Transition Towards Sustainable Energy Systems underscores the urgent need to transform global energy systems so that the world s population has access to energy based on renewable sources This is necessary to protect the global climate and to free those in developing countries trapped by energy poverty Such an approach would also yield a peace dividend by reducing dependence upon regionally concentrated oil reserves The authors stress that such a reconfiguration of energy systems is both feasible and fundable if rapid and resolute action is taken in the coming two decades To this end they propose a roadmap with specific milestones making this an indispensable contribution to the scientific and policy debates on these critical issues and essential reading for those engaged with them

tobacco consumption poor diet and alcohol use represent a growing health burden around the world The seriousness of non communicable diseases is reflected in the adoption of international instruments such as the WHO Framework Convention on Tobacco Control the WHO Global Strategy on Diet Physical Activity and Health and the WHO Global Strategy to Reduce the Harmful Use of Alcohol In line with these instruments states are beginning to use measures such as taxes restrictions on marketing product regulation and labeling measures for public health purposes This book examines the extent to which the law of the World Trade Organization restricts domestic implementation of these types of measures The relationship between international health instruments and the WTO Agreement is examined as are the WTO covered agreements themselves
