around the study of new religious movements NRMs or cults or nontraditional or alternative or emergent religions are so acute that there is even controversy over what to call them John Saliba strives to bring balance to these discussions by offering perspectives on new religions from different academic perspectives history psychology sociology law theology and counseling This approach provides rich descriptions of a broad range of movements while demonstrating how the differing aims of the disciplines can create much of the controversy around NRMs The new second edition has been updated and revised throughout and includes a new foreword by noted historian of religion J Gordon Melton For classes in religion or the social sciences or for interested individuals Understanding New Religious Movements offers the most objective introduction possible

The Psychology of Science and the Origins of the Scientific Mind Gregory J. Feist, 2008-10-01 In this book Gregory Feist reviews and consolidates the scattered literatures on the psychology of science then calls for the establishment of the field as a unique discipline He offers the most comprehensive perspective yet on how science came to be possible in our species and on the important role of psychological forces in an individual's development of scientific interest talent and creativity Without a psychological perspective Feist argues we cannot fully understand the development of scientific thinking or scientific genius The author explores the major subdisciplines within psychology as well as allied areas including biological neuroscience and developmental cognitive personality and social psychology to show how each sheds light on how scientific thinking interest and talent arise He assesses which elements of scientific thinking have their origin in evolved mental mechanisms and considers how humans may have developed the highly sophisticated scientific fields we know today In his fascinating and authoritative book Feist deals thoughtfully with the mysteries of the human mind and convincingly argues that the creation of the psychology of science as a distinct discipline is essential to deeper understanding of human thought processes

The Practice of Prophecy Li Ming Dennis Lum, 2018-03-26 The charisma of prophecy is found throughout the history of the global Pentecostal movement Within the movement prophecy is seen as the communication of an inspired spontaneous revelation bringing edification to the faith community Despite its prevalence academic research has mostly focused on the biblical theological aspect neglecting the actual contemporary practice This book addresses this gap with a study on the practice of prophecy within the Assemblies of God of Singapore The book investigates the nature purpose and significance of the phenomenon It also identifies theological variables that are correlated with its practice and explicates these relationships The investigation employs the empirical theological method of

Johannes van der Ven utilizing both a qualitative and a quantitative study The results provide a rich description of the actual reception delivery and judging of prophecy Significant findings include relationships between prophecy and courage love personality types prayer types and evangelism *The Decision to Trust* Robert F. Hurley, 2011-10-25 A proven model to create high performing high trust organizations Globally there has been a decline in trust over the past few decades and only a third of Americans believe they can trust the government big business and large institutions In *The Decision to Trust* Robert Hurley explains how this new culture of cynicism and distrust creates many problems and why it is almost impossible to manage an organization well if its people do not trust one another High performing world class companies are almost always high trust environments Without this elusive important ingredient companies cannot attract or retain top talent In this book Hurley reveals a new model to measure and repair trust with colleagues managers and employees Outlines a proven Decision to Trust Model DTM of ten factors that establish whether or not one party will trust the other Filled with original examples from Daimler PriceWaterhouse Coopers Goldman Sachs Microsoft QuikTrip General Electric Procter and Gamble AzKoNobel Johnson and Johnson Whole Foods and Zappos Reveals how leaders in Asia Europe and North America have used the DTM to build high trust organizations Covering trust building in teams across functions within organizations and across national cultures *The Decision to Trust* shows how any organization can improve trust and the bottom line

The Villager Feyi Olubodun, 2018-02-05 *The Villager* is essential reading for brand owners wishing to conquer new markets When Feyi Olubodun CEO of one of West Africa's leading creative agencies witnessed one too many cases of brands failing in the African marketplace he began to ask himself questions Why did brands both global and local so often fail to connect with the African consumer And what was it about the African market that brand owners were not seeing He began to reflect on his own marketing experiences and out of this emerged the framework for *The Villager* In Feyi's view the African consumer begins his life's journey by moving from the village his rural dwelling to the city carrying with him not only his own dreams but also the dreams of his community He is a highly aspirational consumer motivated to succeed and he becomes the economic portal for the rest of his community back home But although he may be exposed to global influences and technology his essential identity remains largely intact This is why Feyi calls the African consumer a Villager The Village is no longer a physical space it is a psychological construct that defines him and the filter through which he engages with and consumes brands In developing his construct Feyi posits that if you wish to engage successfully in a market you may not understand you must have the right lenses to view a people He believes the secret lies in applying these lenses at the confluence of commerce culture and consumer Data is not enough to understand the vagaries of a particular market Drawing on his wide experience and wealth of astute observations he provides a highly readable and indispensable guide to the mindset of the African consumer today yet it is true to say that his insights apply albeit in a more nuanced way to consumer behaviour across the globe *Psychoanalytic Defense Mechanisms in Cognitive Multi-Agent Systems* Friedrich

Gelbard,2017-05-18 Human cognitive processes and defense mechanisms as described in psychoanalysis bring about new notions and paradigms for artificial intelligence systems One key reason is that the human cognitive processes and defense mechanisms in question can accomplish conflict detection functionalities filter functionalities and other system stabilizing tasks within artificial intelligence systems Yet artificial cognitive architectures lack the capability to analyze complex situations as well as the universal competencies needed to orientate themselves in complex environments in various domains Psychoanalytic Defense Mechanisms in Cognitive Multi Agent Systems addresses this dilemma by exploring how to describe model and implement psychoanalytic defense mechanisms in the course of a project that provides a functional model of the human mind With discussions focusing on the development of a mathematical description for the implementation of conflict detection the activation and selection of defense mechanisms and the processing of defense mechanisms Psychoanalytic Defense Mechanisms in Cognitive Multi Agent Systems describes the decisive points for the application of defense mechanisms in artificial intelligence Formulae that treat defense mechanisms as transformations are also provided Interdisciplinary cooperation between the scientific fields of psychoanalysis and artificial intelligence is highlighted as the foundation of new research findings throughout the book Innovative and exciting this book will be of great interest to academics researchers and postgraduates in the fields of cognitive science artificial intelligence and psychoanalysis
