The Normal Accident Theory of Education Andrew K. Milton, 2014-04-01 Much of the current debate about education too often resembles the blind men describing an elephant apprehending only a particular part of the situation or the process many analysts tell an evocative but incomplete story The so called reform discussion proceeds with a lack of depth about the nuances and realistic limitations in the institutional order of school This book argues that as regulation of schools moves further up the bureaucratic hierarchy first to state departments of education then to the national department of education the legal and institutional requirements get more intensive but less concretely useful in class rooms This bureaucratization serves to tighten the organizational environment thereby increasing the risk of normal accidents The increasing governmental management in other words makes it more likely that schools will fail to meet their goals Analyses of education are too often developed for public consumption in a fast moving political world This book examines some of the deeper organizational reasons why things don t work so well in school as well as a look at some of things that do work Most importantly the book will explain how the social and cultural expectations of what schools can do may create unrealistic hopes We as a society and schools as institutions embrace these unreasonably high hopes at our collective peril Check out Andrew s latest interview with Seattle Radio <http://kiroradio.com/listen/9972862>

Sociocultural Theory in Second Language Education Merrill Swain, Penny Kinnear, Linda Steinman, 2011 In this accessible introduction to Vygotskyian sociocultural theory narratives illuminate key concepts of the theory These key concepts addressed across seven chapters include mediation Zone of Proximal Development collaborative dialogue private speech everyday and scientific concepts the interrelatedness of cognition and emotion activity theory and assessment An eighth chapter provides readers with an opportunity to consider two additional narratives and apply the SCT concepts that they have become familiar with These narratives come from individuals in a variety of languages contexts ages and proficiencies We hear from learners teachers and researchers Intended for graduate and undergraduate audiences this textbook includes controversies in the field questions for collaborative discussion and provides references to important work in the literature of second language teaching learning and research This book presents a unique introduction to Sociocultural Theory Through the telling of fascinating stories the authors familiarize the reader with the concepts that are central to the theory and in particular to how the theory relates to the teaching and learning of languages beyond the first It is an exceptional piece of scholarship that I think Vygotsky would have wholeheartedly endorsed James P Lantolf the Pennsylvania State University USA This book is a most welcome addition to the growing literature on sociocultural theory It is refreshing to come across such a reader friendly

book dealing with complex constructs The book provides an overview of key concepts in sociocultural theory and then using a set of narratives illustrates how these concepts can be used to explain phenomena in second language learning and teaching As such the authors have succeeded in producing an accessible and highly engaging introduction to sociocultural theory

Neomy Storch The University of Melbourne Australia Sociocultural Theory in Second Language Education is a highly recommended and worthwhile book for all those who seek to understand how sociocultural theory is entailed in teaching practice Using narratives of teaching recounted in the voices of language learners and teachers Swain and her co authors bring the major concepts of Vygotsky to life in clear and accessible ways Contributing to the conceptual analysis of each story is information on allied concepts key studies controversies and discussion topics This book is certain to be a mainstay in language teacher education programs and in courses on sociocultural theory and second language acquisition

Richard Donato University of Pittsburg USA The authors each from a different background share a passion for sociocultural theory Each author brings stories data and experiences from her area of expertise second language pedagogy and teacher development

Linda elementary classroom teaching with second language and bilingual students Penny and teaching and research in bilingual education and second language learning Merrill Penny lectures at the University of Toronto Linda is an associate professor at York University in Toronto Merill is a professor emeritus at OISE University of Toronto

Inequality in Key Skills of City Youth Stephen Lamb, Russell W. Rumberger, 2024-01-01 This groundbreaking research volume addresses the topic of educational inequality from a global perspective It includes 16 chapters from an international group of scholars who examine how well city school systems from around the world are preparing young people particularly poor and minority students with the skills they will need for further study work and life overall While skills in key domains such as science math language and civics have been center stage in international comparisons there has been growing recognition of the effects that education has on the development of broader sets of capabilities such as social and emotional skills also known as noncognitive or 21st century skills that can affect the success of students in school and beyond This volume aims to address the shortage of international data on the wide range of skills that students need to learn enabling researchers to compare the types and causes of educational inequality in skills within and between cities
