Leading investigators address all aspects of dual process theories: their core assumptions, conceptual foundations, and applications to a wide range of social phenomena. In 38 chapters, the volume addresses the pivotal role of automatic and controlled processes in attitudes and evaluation, social perception, thinking, and reasoning, self-regulation, and the interplay of affect, cognition, and motivation. Current empirical and methodological developments are described. Critiques of the duality approach are explored, and important questions for future research identified.

Dual-process Theories in Social Psychology Shelly Chaiken, Yaacov Trope, 1999-02-19 This informative volume presents the first comprehensive review of research and theory on dual process models of social information processing. These models distinguish between qualitatively different modes of information processing in making decisions and solving problems, e.g., associative versus rule-based, controlled versus uncontrolled, and affective versus cognitive modes. Leading contributors review the basic assumptions of these approaches and review the ways they have been applied and tested in such areas as attitudes, stereotyping, person perception, memory, and judgment. Also examined are the relationships between different sets of processing modes, the factors that determine their utilization, and how they work in combination to affect responses to social information.

Authored by leading international experts, each chapter represents a personal and historical narrative of the theory's development, including the inspirations, critical junctures, and problem-solving efforts that have effected the choices made in each theory's evolution, as well as the impact each has had on the canon of social psychology. Unique to this handbook, these narratives provide a rich background for understanding how theories are created, more generally, how they are nurtured and shaped over time, and how, through examination, we can better understand their unique contribution to society as a whole.
