Modern Nicaraguan Poetry Steven F. White,1993 This work demonstrates that twentieth century Nicaraguan poetry can not be comprehended in its fullest dimension without an understanding of the literary traditions of France and the United States Ever since Ruben Dario established Hispanic America's literary independence from Spain in the nineteenth century with his modernista revolution poets in Nicaragua actively have engaged in a dialogue with the works of French and North American authors as a means of assimilating and transforming them and thereby inventing a profoundly Nicaraguan literary identity This process has resulted in what might be called a double genealogy in Nicaraguan poetry certain poets attracted to the alchemical properties of the poetic word and a transcendent mythic meta reality seem to have descended from French literary forebears others interested in an expansive poeticized version of history and verisimilitude have roots that might be traced to North American soil This division is a provisional experimental means of grouping

Nicaraguan poets based not on the traditional compartmentalization of literary generations but on the family resemblances of poetic affinities Presented here is an effective analysis of the familial nature of the Nicaraguan poets achieving their own literary independence by taking into account socio political and historical considerations common literary themes as well as the intertextual relations that form the basis of international literary dialogues This rigorous but flexible approach to modern Nicaraguan poetry enables the reader to accompany the poets on their journeys toward God and the end of the world into a timeless Nicaraguan landscape invaded by U S Marines beyond a contemporary urban portrait of Los Angeles through the horrifying European battlefields of World War I and the trenches of Nicaragua s revolution against the Somoza dictatorship The English speaking reader probably will be unfamiliar with most of the seven preeminent Nicaraguan poets whose works are the subject of this book but it is hoped that the reader will realize that the poetry of Nicaraguans Alfonso Cortes Salomon de la Selva Jose Coronel Urtecho Pablo Antonio Cuadra Joaquin Pasos Carlos Martinez Rivas and Ernesto Cardenal is worthy of serious study Furthermore the poems of these authors take on a richer meaning when they are studied as co presences in relation to certain texts by Baudelaire Rimbaud Mallarme and Supervielle or in an American context by poets such as Whitman Pound Eliot and Masters A relatively small country with a rich diverse tradition in poetry Nicaragua has maintained high literary standards generation after generation and has produced poets of a world class stature whose time has come for greater recognition

A Cultural History of the Sea in the Age of Empire Margaret Cohen,2023-02-09 Across the 19th century maritime globalization expanded at a hitherto unimaginable pace transforming transport and communications over the seas into oceanic networks at a planetary scale These networks shaped culture in its most expansive sense affecting seafaring warfare empire commerce communications passenger travel leisure and science Authors recover the sea experience of people and groups entangled with and yet neglected in an earlier generation of maritime history focused on conquest empire and knowledge Thus across a century when Britannia nominally ruled the waves military control emerges as both opportunistic harboring slavers as well as partial giving agency to mutineers and enslaved crew members including on the Royal Navy s own fleet the wreck of Arctic exploring voyages such as the Erebus and the Terror takes readers to PanInuit exploration over sea ice around the Arctic circle colonial and mercantile transport in the Indian Ocean reveals the role of lascars the seafarers of color who for centuries had practiced these waters on the coasts of industrial nations the professional establishment of marine sciences depends on the pathbreaking contributions of female amateur naturalists As part of its revisionary aim this volume gives voice to the physical environment Thus we discover contrasting perspectives about this environment under threat today of European mariners for whom it was deadly and treacherous and for maritime Aborigines who lived in its shelter Considering literature and art as well as history authors further trace how the paradoxes of sea practice shape some of the most memorable ocean fantasies of the Western tradition fostering both a celebration of work and technology and a preservation of secular magic in a disenchanted world
