The Higher Education Institutions Handbook ,2012 **Adoption of agricultural innovations by smallholder farmers in the context of**

HIV/AIDS Faith N. Nguthi,2023-08-28 Using tissue cultured technology is a potentially important way for smallholder banana farmers to improve their yields and income In the situation of the impoverishing effects of high HIV AIDS prevalence in a rural banana farming community this applies even more The research documented in this book examines the balance between required inputs and potential benefits of applying the tissue cultured technology among HIV AIDS affected and non affected households in Maragua district Central Kenya using a livelihood approach The results show that adoption of the technology and its continued use differs according to the resources endowment of the farming households Lack of financial and physical capital notably a water tank inhibits adoption irrespective of HIV AIDS status However households headed by elderly females dominate among the poor households and the HIV AIDS affected households This illustrates how HIV AIDS interfaces with poverty and thereby indirectly with the feasibility of sustainable technology adoption The research also shows that livelihood decisions and strategies of farming households are influenced by land tenure status having title deeds or not

and labour constraints at the household level The latter arise as a consequence of HIV AIDS related morbidity and mortality

The Rise and Fall of Philanthropy in East Africa Robert G. Gregory, 2017-07-05 Robert G Gregory challenges the apparent assumption that non Western peoples lack a significant indigenous philanthropic culture Focusing on the large South Asian community in East Africa he relates how over a century they built a philanthropic culture of great magnitude and how it finally collapsed under the ascendancy of increasing state regulation and policies directed against non African communities Compelled by poverty to seek better opportunities overseas most Asians arrived in East Africa as peasant farmers Denied access to productive land and sensing economic opportunity they turned to business Despite severe forms of racial discrimination in the colonial society they suffered few restrictions on their business enterprises and some became very wealthy Gregory s historical analysis shows philanthropy as an important contribution one that stemmed from deep roots in Hindu Muslim and Buddhist culture The sense of nonracial social responsibility cultivated social medical and educational facilities designed for all This age of philanthropy terminated with the Asian exodus The socialist and racial policies adopted by East African governments over the past few decades have virtually destroyed the foundation necessary for philanthropy as well as the distinct Asian cultural identity Gregory s account of the East Asian s role in philanthropy deserves great attention and sober reflection

Evidence on the Benefits of Integrating Mental Health and HIV into Packages of Essential Services and Care Olumide Abiodun ,Theddeus Iheanacho,Saheed Akinmayowa Lawal, 2024-10-25 As the 21st century continues to unfold emerging re emerging and newly emerging infectious diseases will become more pronounced These infectious diseases like Coronavirus disease COVID 19 which has led to 6 330 802 deaths globally as of 28th June 2022 contend with other existing global health priorities such as mental health HIV AIDs cancers malaria and monkeypox The COVID 19 pandemic has forced many countries to focus their attention and resources on tackling the disease paying less attention to other public health issues such as the need to integrate mental health services into HIV care But investing in mental health and psychosocial support and ensuring the integration of mental health and HIV interventions are critical for achieving universal health coverage ensuring health equity and ending the AIDS epidemic WHO 2022 6
