future out of school science learning environments Written by leading experts and innovators in informal science learning these thoughtful and critical essays examine the changing nature of informal institutions such as science museums zoos nature centers planetariums aquaria and botanical gardens and their impact on science education The book examines the learning opportunities and challenges created by community based experiences including citizen science makerspaces science media escape rooms hobby groups and gaming Based on current practices case studies and research the book focuses on four cross cutting themes inclusivity digital engagement community partnerships and bridging formal and informal learning to examine how people learn science informally The book will be of interest to STEM science technology engineering and math educators both in and out of school designers of science and experiential education programs and those interested in building STEM learning ecosystems in their communities

Connected Gaming Yasmin B. Kafai,Quinn Burke,2024-03-19 How making and sharing video games offer educational benefits for coding collaboration and creativity Over the last decade video games designed to teach academic content have multiplied Students can learn about Newtonian physics from a game or prep for entry into the army An emphasis on the instructionist approach to gaming however has overshadowed the constructionist approach in which students learn by designing their own games themselves In this book Yasmin Kafai and Quinn Burke discuss the educational benefits of constructionist gaming coding collaboration and creativity and the move from computational thinking toward computational participation Kafai and Burke point to recent developments that support a shift to game making from game playing including the game industry s acceptance and even promotion of modding and the growth of a DIY culture Kafai and Burke show that student designed games teach not only such technical skills as programming but also academic subjects Making games also teaches collaboration as students frequently work in teams to produce content and then share their games with in class or with others online Yet Kafai and Burke don t advocate abandoning instructionist for constructionist approaches Rather they argue for a more comprehensive inclusive idea of connected gaming in which both making and gaming play a part
