Computer Security -- ESORICS 2013 Jason Crampton, Sushil Jajodia, Keith Mayes, 2013-08-15 This book constitutes the refereed proceedings of the 18th European Symposium on Computer Security ESORICS 2013 held in Egham UK in September 2013. The 43 papers included in the book were carefully reviewed and selected from 242 papers. The aim of ESORICS is to further the progress of research in computer security by establishing a European forum for bringing together researchers in this area by promoting the exchange of ideas with system developers and by encouraging links with researchers in related areas. The papers cover all topics related to security, privacy and trust in computer systems and networks. *Encyclopedia of Information Science and Technology, Third Edition* Khosrow-Pour, D.B.A., Mehdi, 2014-07-31 This 10 volume compilation of authoritative research based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities, prospective solutions and future directions in the field of information science and technology. Provided by publisher. **Informatics in Control, Automation and Robotics** Oleg Gusikhin, Kurosh Madani, 2019-04-18 The book focuses the latest endeavours relating researches and developments conducted in fields of Control, Robotics and Automation. Through more than twenty revised and extended articles, the present book aims to provide the most up to date state of art of the aforementioned fields, allowing researcher, PhD students and engineers not only updating their knowledge but also benefiting from the source of inspiration that represents the set of selected articles of the book. The deliberate intention of editors to cover as well theoretical facets of those fields as their practical accomplishments and implementations offers the benefit of gathering in a same volume a factual and well balanced prospect of nowadays research in those topics. A special attention toward Intelligent Robots and Control may characterize another benefit of this book. **Leveraging Applications of Formal Methods, Verification and Validation** Tiziana Margaria, Bernhard Steffen, 2012-09-25 The two volume set LNCS 7609 and 7610 constitutes the thoroughly refereed proceedings of the 5th International Symposium on Leveraging Applications of Formal Methods, Verification and Validation held in Heraklion, Crete, Greece in October 2012. The two volumes contain papers presented in the topical sections on: adaptable and evolving software for eternal systems; approaches for mastering change; runtime verification; the application perspective; model based testing and model inference; learning techniques for software verification and validation; LearnLib tutorial from finite automata to register interface programs; RERS grey box challenge 2012; Linux driver verification; bioscientific data processing and modeling; process and data integration in the networked healthcare; timing constraints theory meets practice; formal methods for the development and certification of X by wire; control systems; quantitative modelling and analysis; software aspects of robotic systems; process oriented geoinformation systems and applications; handling heterogeneity in formal development of HW and SW Systems. Computational Network Theory Matthias Dehmer, Frank Emmert-Streib, Stefan Pickl, 2015-04-28 This comprehensive introduction to computational network

theory as a branch of network theory builds on the understanding that such networks are a tool to derive or verify hypotheses by applying computational techniques to large scale network data The highly experienced team of editors and high profile authors from around the world present and explain a number of methods that are representative of computational network theory derived from graph theory as well as computational and statistical techniques With its coherent structure and homogenous style this reference is equally suitable for courses on computational networks
