**Atmosphere** C. Alan Short, Peter Barrett, Alistair Fair, Monty Sutrisna, 2016-12-05 Drawing on detailed design construction and financial histories of six prominent Performing Arts buildings with budgets ranging from 3 4 million to over 100 million Geometry and Atmosphere presents unique and valuable insights into the complex process of building for the arts Each theatre project from tailor made spaces for avant garde companies to iconic and innovative receiving houses yields surprising and counter intuitive findings For each of the six projects the authors have interviewed all those involved Combining these interviews with exhaustive archival research the authors then provide cross case analysis which is distilled into guidance for all stakeholders as they transform their initial vision into built reality In particular the book challenges the technical focus of existing design guides for the Performing Arts by suggesting that current practice in briefing and design does not serve the Arts community especially well It shows that there is a need for an approach in which the focus is firmly rooted in the delivery of the driving artistic vision As well as being of interest to architects urban designers and those involved in theatre studies this book will be useful to other sectors where public money is spent on major building projects **Theater**

building is a complex process in which the architect develops spaces which are defined by a number of different parameters The most important of these are space requirements distances furniture and fittings and movement zones From the dimensions of the human body it is possible to derive guide values for these reference sizes that make spaces comfortable to be in and to use Spaces in Architecture is a useful reference work for students and designers for quickly looking up detailed information on space scenarios that occur in many different types of buildings For example the book lists all important dimensions for entrance areas doors staircases ramps and elevators On the basis of this fundamental information it is possible to design buildings in terms of function and type **Setting the Scene** Alistair Fair, 2016-03-03 During the

twentieth century an increasingly diverse range of buildings and spaces was used for theatre Theatre architecture was re formed by new approaches to staging and performance while theatre was often thought to have a reforming role in society Innovation was accompanied by the revival and reinterpretation of older ideas The contributors to this volume explore these ideas in a variety of contexts from detailed discussions of key architects work including Denys Lasdun Peter Moro Cedric Price and Heinrich Tessenow to broader surveys of theatre in West Germany and Japan Other contributions examine the Malm Stadsteater ideal theatres in post war North America found space in 1960s New York and Postmodernity in 1980s East

**The Affect of Difference** Christopher P. Hanscom, Dennis Washburn, 2016-05-31 The Affect of Difference is a collection of essays offering a new perspective on the history of race and racial ideologies in modern East Asia Contributors approach this subject through the

exploration of everyday culture from a range of academic disciplines each working to show how race was made visible and present as a potential means of identification By analyzing artifacts from diverse media including travelogues records of speech photographs radio broadcasts surgical techniques tattoos anthropometric postcards fiction the popular press film and soundtracks an archive that chronicles the quotidian experiences of the colonized their essays shed light on the politics of inclusion and exclusion that underpinned Japanese empire One way this volume sets itself apart is in its use of affect as a key analytical category Colonial politics depended heavily on the sentiments and moods aroused by media representations of race and authorities promoted strategies that included the colonized as imperial subjects while simultaneously excluding them on the basis of natural differences Chapters demonstrate how this dynamic operated by showing the close attention of empire to intimate matters including language dress sexuality family and hygiene The focus on affect elucidates the representational logic of both imperialist and racist discourses by providing a way to talk about inequalities that are not clear cut to show gradations of power or shifts in definitions of normality that are otherwise difficult to discern and to present a finely grained perspective on everyday life under racist empire It also alerts us to the subtle often unseen ways in which imperial or racist affects may operate beyond the reach of our methodologies Taken together the essays in this volume bring the case of Japanese empire into comparative proximity with other imperial situations and contribute to a deeper more sophisticated understanding of the role that race has played in East Asian empire British Theatre and Young People Uğur
