

16 Darwin's Theory of Evolution

Evolution

Q: What is natural selection?

16.1 What patterns of biodiversity did Darwin observe aboard the *Beagle*?

WHAT I KNOW

Simple answer: On each island that Darwin visited, he saw different species of plants and animals.

WHAT I LEARNED

Simple answer: Darwin noticed that different, yet similar, species inhabited separated, but similar, habitats around the globe. Also, different, yet related, species often occupied different habitats within a local area.

16.2 How did other scientists' work help Darwin develop his theory of natural selection?

Simple answer: Other scientists did research on how organisms inherited different traits.

Simple answer: Hutton and Lyell concluded that Earth is extremely old. Lamarck suggested that species are not fixed. Malthus reasoned larger populations would deplete resources.

16.3 What is Darwin's theory of evolution by natural selection?

Simple answer: Organisms that are best adapted to their environment survive longer and have more offspring.

Simple answer: Natural selection is the process by which organisms with variations most suited to their local environment survive and leave more offspring. Over time, beneficial traits accumulate in a population.

16.4 What are the main lines of scientific evidence that support Darwin's theory of evolution by natural selection?

Simple answer: Fossils show how organisms have changed over time.

Simple answer: Biogeography, fossils, homologous structures, similarities in embryological development, the universal genetic code, homologous molecules, and field studies provide evidence of evolution.

The Symbolic Species: The Co-evolution of Language and the Brain Terrence W. Deacon, 1998-04-17 A work of enormous breadth likely to pleasantly surprise both general readers and experts New York Times Book Review This revolutionary book provides fresh answers to long standing questions of human origins and consciousness Drawing on his breakthrough research in comparative neuroscience Terrence Deacon offers a wealth of insights into the significance of symbolic thinking from the co evolutionary exchange between language and brains over two million years of hominid evolution to the ethical repercussions that followed man s newfound access to other people s thoughts and emotions Informing these insights is a new understanding of how Darwinian processes underlie the brain s development and function as well as its evolution In contrast to much contemporary neuroscience that treats the brain as no more or less than a computer Deacon provides a new clarity of vision into the mechanism of mind It injects a renewed sense of adventure into the experience of being human

Big Bang or Big Bluff Hans Binder, *The Evolution of Consciousness* Paula Droege, 2021-11-04 The Evolution of Consciousness brings together interdisciplinary insights from philosophy neuroscience

psychology and cognitive science to explain consciousness in terms of the biological function that grounds it in the physical world Drawing on the novel analogy of a house of cards Paula Droege pieces together various conceptual questions and shows how they rest on each other to form a coherent structured argument She asserts that the mind is composed of unconscious sensory and cognitive representations which become conscious when they are selected and coordinated into a representation of the present moment This temporal representation theory deftly bridges the gap between mind and body by highlighting that physical systems are conscious when they can respond flexibly to actions in the present With examples from evolution animal cognition introspection and the free will debate this is a compelling and animated account of the possible explanations of consciousness offering answers to the conceptual question of how consciousness can be considered a cognitive process

The Nation, 1888 **Personal Reality, Volume 2** Daniel Paksi, 2019-05-13 Western civilization was built on the concept of God Today modern science based on the critical method and so called objective facts denies even the existence of our soul There is only matter atoms molecules and DNA sequences There is no freedom there are no well grounded beliefs The decline of Western civilization is not the simple consequence of decadence hedonism and malevolence Modern critical science has liberated us from the old dogmas but failed to establish our freedoms values and beliefs However human knowledge is not objective but personal We are the children of evolution Everybody sees the world from his own personal point of view anchored into his her body We use our billions of years old evolutionary skills and thousands of years old cultural heritage to recognize and acknowledge the personal facts of our reality freedom and most important natural beliefs respect and speak the truth In reality even science itself is based on our personal knowledge Only our false conceptual dichotomies paralyze our thinking God or matter there is a third choice the emergence of life and human persons This is the only way to defend our freedoms and the Christian moral dynamism of free Western societies
