A Compendium of the Law and Practice of Injunctions Robert Henley Eden Baron Henley, 1852 **The Ethics of New Reproductive Technologies** Dolores Dooley, 2003-05

The new reproductive technologies NRTs have given rise to new ethical questions that are widely debated. This book, the outcome of a European Union wide collaborative process, draws on the experience and expertise of ethicists, lawyers, and clinical practitioners and focuses on some of the burning issues in different European countries. These include donor insemination, surrogacy, preimplantation genetic diagnosis, embryo research, access to IVF treatment, and parental professional and social responsibility. Familiar notions such as quality of life, parenthood, mothering, responsibility, and personal identity surface at many points throughout the book and are refashioned to accommodate new questions. This book introduces and probes ethical questions and challenges in a hands-on way by working through relevant case studies with key commentaries and activities. It engages the reader directly in ethical reasoning and decision making and provides clear explanations, insightful commentaries, and informed debate on NRTs.
