The Imaginative Argument Frank L. Cioffi, 2017-12-11 More than merely a writing text The Imaginative Argument offers writers instruction on how to use their imaginations to improve their prose Cioffi shows writers how they can enliven argument the organizing rubric of all persuasive writing by drawing on emotion soul and creativity the wellsprings of imagination While Cioffi suggests that argument should become a natural habit of mind for

writers he goes still further inspiring writers to adopt as their gold standard the imaginative argument the surprising yet strikingly apt insight that organizes disparate noises into music that makes out of chaos chaos theory Rather than offering a model of writing based on established formulas or templates Cioffi urges writers to envision argument as an active parsing of experience that imaginatively reinvents the world Cioffi s manifesto asserts that successful argument also requires writers to explore their own deep seated feelings to exploit the fuzzy but often profoundly insightful logic of the imagination But expression is not all that matters Cioffi s work anchors itself in the actual Drawing on Louis Kahn s notion that a good architect never has all the answers to a building s problems before its physical construction Cioffi maintains that in argument too answers must be forged along the way as the writer inventively deals with emergent problems and unforeseen complexities Indeed discovery imagination and invention suffuse all stages of the process The Imaginative Argument offers all the intellectual kindling that writers need to ignite this creativity from insights on developing ideas to avoiding bland assertions or logical leaps It cites exemplary nonfiction prose stylists including William James Ruth Benedict and Erving Goffman as well as literary sources to demonstrate the dynamic of persuasive writing Provocative and lively it will prove not only essential reading but also inspiration for all those interested in arguing more imaginatively more successfully This edition features new chapters that cover the revision process in greater depth as well as the particular challenges of researching and writing in the digital age such as working with technology and avoiding plagiarism The book also includes new sample essays an appendix to help instructors use the book in the classroom and much more *Library Media*

Grammalepsy John Cayley,2018-09-20 Collecting and recontextualizing writings from the last twenty years of John Cayley s research based practice of electronic literature *Grammalepsy* introduces a theory of aesthetic linguistic practice developed specifically for the making and critical appreciation of language art in digital media As he examines the cultural shift away from traditional print literature and the changes in our culture of reading Cayley coins the term *grammalepsy* to inform those processes by

which we make understand and appreciate language Framing his previous writings within the overall context of this theory Cayley eschews the tendency of literary critics and writers to reduce aesthetic linguistic making even when it has multimedia affordances to writing Instead Cayley argues that electronic literature and digital language art allow aesthetic language makers to embrace a compositional practice inextricably involved with digital media which cannot be reduced to print dependent textuality

Writing Apprehension and Anti-writing Linda Bannister, 1992 Linda Bannister's Writing Apprehension and Anti Writing is an important early piece of composing process research that fortunately is now being made available by the Mellen Press In this study Dr Bannister combines survey and case study methodology to take a close look at how apprehension affects the composing process particularly planning and finds that contrary to general belief some level of apprehension aids production She also investigates and theorizes what she calls anti writing a delay in writing as she puts it for the purpose of nurturing ideas Along the way she complicates easy notions about the relationship of apprehension to the quality of writing about the place of pausing in effective planning and about the ways planning might be conceptualized Her work provides empirical support for Donald Murray's belief in the essential delay in composing and except for Stephen Witte's 1987 Pretext and composing provides the best researched based examination we have of that writing is not writing Mike Rose UCLA Writing Program 1991
