Summary of Ha-Joon Chang's 23 Things They Don't Tell You about Capitalism Everest Media, 2022-05-09T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 When the government interferes with the free market resources cannot be directed to their most efficient use If people are not allowed to do the things that they find most profitable they lose the incentive to invest and innovate 2 The free market doesn t exist Every market has some rules and boundaries that restrict freedom of choice A market appears free only because we so unconditionally accept its underlying restrictions that we fail to see them 3 The free market is an illusion If some markets look free it is only because we so totally accept the regulations that are propping them up that they become invisible 4 The free market is a bit like that We accept the legitimacy of certain regulations so totally that we don t see them More carefully examined markets are revealed to be propped up by rules

Creating Freedom Raoul Martinez, 2017-01-31 The ideal of freedom is at the heart of our political and economic system It is foundational to our sense of justice our way of life our conception of what it is to be human But are we free in the way that we think we are In *Creating Freedom* Raoul Martinez brings together a torrent of mind expanding ideas facts and arguments to dismantle sacred myths central to our society myths about free will free markets free media and free elections From the lottery of our birth to the consent manufacturing influence of concentrated power this far reaching manifesto lifts the veil on the mechanisms of control that pervade our lives It shows that the more we understand how the world shapes us the more effectively we can shape the world A highly original exploration of the most urgent questions of our time *Creating Freedom* reveals that we are far less free than we like to think but it also shows that freedom is something we can create together In fact our very survival may depend on our doing so

An Alternative Philosophy of Development Birendra Prasad Mathur, 2016-11-25 While development has been the foremost agenda before successive governments in India it has been viewed narrowly from the perspective of economic development and particularly in terms of gross domestic product GDP This book questions such an approach It breaks from

the conventional wisdom of GDP growth as being a definitive measure of the success of a country's policies and offers an alternative development philosophy. The author contends that people's economic and social welfare, life satisfaction, self-fulfilment and happiness should be treated as indicators of real development. The book underlines that in a successful model of development the country's economic policies will have to synergize with its cultural ethos and that the objective of development should be gross national happiness and well-being of the people. This book will be useful to scholars and researchers of development studies, economics, public policy and administration, governance, political science and sociology as well as to policymakers.

Comparative Law Yearbook of International Business Volume 43 Christian Campbell, 2021-11-11. The Comparative Law Yearbook of International Business published under the auspices of the Center for International Legal Studies in this 43rd volume spans an arc of timely and challenging concerns for business law practitioners and academics alike. It discusses how arbitrability of intellectual property rights disputes might improve worldwide IPR enforcement; how the disregard of legal entity may be used to establish implied consent by a person or entity that is not a signatory to an arbitration agreement; how an effective cross-border insolvency framework under the Indian insolvency and bankruptcy code can borrow from the UNCITRAL Model Law's and other jurisdictions' approaches to the tension between universality and territoriality; how a promising new mediation act for Pakistan may help resolve a backlog of millions of cases in a jurisdiction with a patchwork of traditional and modern alternative dispute resolution mechanisms; how the European Union seeks to balance the taxation of digital services; how Brazil is addressing the taxation of offshore indirect transfers; how private equity capital structures in the unique market of professional sports create opportunities as well as risks; how Securities Market Regulation theory plays a role in the organization and development of active securities markets particularly in emerging markets; and how non-signatories can be bound by arbitration agreements in Brazil through disregard of legal entity to ascertain implied consent. The authors are practitioners and academics from Brazil, England, France, India, Pakistan, Singapore, the United States and Uzbekistan. They offer a broad and diverse perspective on some of today's pressing business law issues in a shrinking world.

Life Full of Reading Syed Ahmad Fathi bin Syed Mohd Khair, 2020-06-05. A quite afternoon, a cozy chair, a warm cup of coffee and a good book: these are the perfect description of moments that should be cherished in this short life. Carl Sagan once said that reading is magical that it enables humans from different epochs to talk to each other; it is more than that. Reading is a gateway to imagination, a world without limit, a safe space to escape from enduring reality. Sometimes it is a space where you socialize without having to meet people. This book is a compilation of book reviews written over the years. The book was broken into two parts: the first part is the long reviews; the second part is the short reviews which covered a wide range of genres from economics, self-help, novels, comic book to political philosophy and parenting.
