Brain research has the power to revolutionize education, but it can be difficult for educators to implement innovative strategies without the proper knowledge or resources. *The Education Revolution* bridges the gap between neuroscience, psychology, and educational practice. It delivers what educators need: concrete applications of the most current and relevant research that they can use in their classrooms and schools. Readers will find teaching strategies based on the latest brain research designed to advance academic performance. Scientifically sound, solution-focused practices to address the root of negative behaviors. Approaches to counteract the negative impact of technology on the brain. Concrete methods to improve school climate. Model lessons for teachers that demonstrate how to implement the given strategies. Written by Horacio Sanchez, a leading authority on child and adolescent behavior and resiliency, this book shows educators how they can use our growing understanding of brain science to restore students' desire to learn, improve achievement, behavior, and school climate, and revolutionize education. Sanchez combines expertise in education, psychology, and neuroscience with extensive teaching experience and extraordinary insight into what makes us all behave the way we do. Dr. David L. Katz, President, American College of Lifestyle Medicine, Director, Yale University Prevention Research Center. *The Education Revolution* focuses on the whole child through both academic and social aspects of learning. I feel confident that I can trust this research and use these ideas in my teaching.
