Handbook of Individual Differences in Reading Peter Afflerbach, 2015-08-11 The central unifying theme of this state of the art contribution to research on literacy is its rethinking and reconceptualization of individual differences in reading Previous research focused on cognitive components of reading signaled the need for ongoing work to identify relevant individual differences in reading to determine the relationship s of individual differences to reading development and to account for interactions among individual differences Addressing developments in each of these areas this volume also describes affective individual differences and the environments in which individual differences in reading may emerge operate interact and change The scant comprehensive accounting of individual differences in reading is reflected in the nature of reading instruction programs today the outcomes that are expected from successful teaching and learning and the manner in which reading development is assessed An important contribution of this volume is to provide prima facie evidence of the benefits of broad conceptualization of the ways in which readers differ The Handbook of Individual Differences in Reading moves the field forward by encompassing cognitive non cognitive contextual and methodological concerns Its breadth of coverage serves as both a useful summary of the current state of knowledge and a guide for future work in this area

Elementary Mathematics Curriculum Materials Janine T. Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors
