Streed, 2017-01-25 Today law enforcement requires actionable and real time intelligence 24 hours a day seven days a week to help respond to cases efficiently When evidence is lacking in a case law enforcement officers are often times left to rely on eyewitness descriptions In order to quickly disseminate facial composites to news outlets and social media law enforcement needs to rely on every tool available including traditional forensic artists and advanced facial composite software Creating Digital Faces for Law Enforcement provides the proper foundation for obtaining key information needed to create effective facial composites There are two main methods to create a facial composite first through traditional forensic art techniques and second by using commercially developed facial composite software Traditional forensic art has advanced from pen and paper to more enhanced digital tools This text reviews the development of digital tools used by the forensic artist describing each tool in detail Creating Digital Faces for Law Enforcement is the first text of its kind to address the creation of digital sketches for forensic artists and software driven sketches for non artist technicians A step by step guide addressing the creation of digital software driven sketches for non artist technicians Includes descriptions supported by both photographs and video demonstrations to assist the reader in better understanding the process Written by an internationally recognized police sketch artist with over 35 years of experience A companion website page will host author created narrated videos for reader access [Creating Intelligent Content with Lightweight DITA](#) Carlos Evia, 2018-12-07 Creating Intelligent Content with Lightweight DITA documents the evolution of the Darwin Information Typing Architecture DITA a widely used open standard for structuring technical content DITA has grown in popularity and features since its origins as an internal grammar for structuring technical documentation at IBM This book introduces Lightweight DITA LwDITA which should be read as Lightweight DITA

as a proposed version of the DITA standard that reduces its dependence on complex Extensible Markup Language XML structures and simplifies its authoring experience This volume aims to reconcile discrepancies and similarities in methods for authoring content in industry and academia and does so by reporting on DITA s evolution through the lens of computational thinking which has been connected in scholarship and media to initiatives for learning to code and programming Evia s core argument is that if technical communicators are trained with principles of rhetorical problem solving and computational thinking they can create structured content in lightweight workflows with XML HTML5 and Markdown designed to reduce the learning curve associated with DITA and similar authoring methodologies At the same time this book has the goal of making concepts of structured authoring and intelligent content easier to learn and teach in humanities based writing and communication programs This book is intended for practitioners and students interested in structured authoring or the DITA standard

A Theory of Craft Howard Risatti,2009-12 What is craft How is it different from fine art or design In A Theory of Craft Howard Risatti examines these issues by comparing handmade ceramics glass metalwork weaving and furniture to painting sculpture photography and machine made design from Bauhaus to the Memphis Group He describes craft s unique qualities as functionality combined with an ability to express human values that transcend temporal spatial and social boundaries Modern design today has taken over from craft the making of functional objects of daily use by employing machines to do work once done by hand Understanding the aesthetic and social implications of this transformation forces us to see craft as well as design and fine art in a new perspective Risatti argues Without a way of understanding and valuing craft on its own terms the field languishes aesthetically being judged by fine art criteria that automatically deny art status to craft objects Craft must articulate a role for itself in contemporary society says Risatti otherwise it will be absorbed by fine art or design and its singular approach to understanding the world will be lost A Theory of Craft is a signal contribution to establishing a craft theory that recognizes defines and celebrates the unique blend of function and human aesthetic values embodied in the craft object

Technical Documentation Best Practices - Visually

Designing Modern Help Systems and Manuals Marc Achteilig,2020-10-25 Aesthetics isn't the only thing that you should be striving for when designing a user manual template or the style sheet of an online help system When creating technical documentation usability readability and simplicity are at least just as crucial The design should please the eye but at the same time it must communicate the content clearly In addition paragraph styles and character styles should be efficient to use for the author when writing the document The layout process should be automated as much as possible Because most user assistance documents are frequently updated during their life cycle an automated layout process is much more important here than with other kinds of literature Setting up templates and style sheets that are efficient to use when creating and updating user assistance requires a lot of experience in technical writing The rules presented in this book are the essence of this experience All chapters provide various examples that you can use for inspiration and as starting points for your own designs Topics covered Layout basics Setting the type area Choosing fonts and spacing Creating semantic styles Organizing styles hierarchically Recommended screen layouts Recommended page layouts Recommended table designs Recommended paragraph styles Recommended character styles
