that jet lag should be studied as a confounding effect of DVT that the Government should explore ways to increase the research capacity in aviation health that the CAA should implement the recommendations of its own research into aircraft seating standards and increase the minimum seat pitch to at least 28 2 inches the Government should also review the level of air passenger duty levied on premium economy seating also that the Government and airlines advise passengers on the proven benefits of good hygiene in the reduction of disease transmission and that as part of their contingency plans airlines that are flying from areas affected by a pandemic should provide bacterial wipes to passengers that the Government and the AHU work together with airlines and others in providing consistent air travel advice to passengers on the risks associated with self medicating with the intention of preventing DVT
