Project Management Tools and Organisation Sprache Deutsch Abstract While a project is a form of organisation which is

characterised through its uniqueness its novelty and a fixed end date a virtual project team is distributed over different

locations worldwide but working together as one team Remote communication between the team members is done through

synchronous and asynchronous means of virtual communication Because these media cannot transmit the full bandwidth of

human communication there must be rules set how to act with these different means of virtual communication in order to

prevent frustration and communication problems Additional difficulties may arise when a virtual project team is composed of

people with different cultural backgrounds In such a case a project manager of a virtual team has to join communication

skills with intercultural skills In order to work together under these circumstances team building is crucial to make a virtual

project a success Successful team building in a virtual project first of all means that people with the right characteristics

have to be chosen to form a virtual project team For example they must have a high level of self organisation and social

competence Furthermore building trust is crucial in order to make people who may never see each other in real life

successfully work together In order to manage the task of a virtual project a project manager of such a team needs a high

level of social skills coupled with the skills of a motivator The Blended Delivery model of Logica a global provider of IT

services where a local core team works together with an extended virtual team may be a good compromise between virtual

and non virtual project work and may combine benefits of both **When Teammates Do Not Respond** Niki Panteli, 2018

The case presents a real life situation that is often experienced among managers of virtual geographically dispersed project

teams These are teams with limited if any face to face contact among co workers and team members Problems occur when

there are changing project requirements and when there is poor coordination and communication among project team

members themselves As such you want your co workers or even your project manager to communicate with you but they don

t instead they remain silent In these conditions the dispersed members may feel frustrated rejected and withdrawn all of which have the potential to negatively affect individual and overall project performance The case asks what the manager's role should be in such situations Students are also encouraged to think in terms of what needs to be done in order to avoid such situations and build effective virtual teams **The AMA Handbook of Project Management** Paul C.
