Cartridge

The cartridge consists of a hollow steel forging with a hemispherical base, a streamlined ogive, and a sliding metal rotating band. A base cover is welded to the base of the projectile for added protection against the entrance of hot gases from the propelling charge during

A tetrazol burner charge is placed inside the burner casing and a V2 base threaded into the adapter. The cartridge case contains a percussion primer assembly and seven individually bagged and numbered propelling charge increments. The base of the cartridge case is drilled and the primer assembly pressed into the base.
