what it takes to succeed Excerpt from the Book For most people what's inside the body is a great mystery Haven't you found that to be so Most people entertain vague ideas about where organs are located what they do and how they work But for those of us who study human gross anatomy it's different For those of us who have the splendid opportunity to explore the body for ourselves to actually see for ourselves the beauty and grace inside the human body and to learn its secrets in order to better serve our patients it's a compelling once in a lifetime revelation Ours is a uniquely privileged study and that study would be impossible except for the unrequitable thoughtfulness of people we've never met who had the charity to give to us what was their most intimate home for seventy eighty ninety years We begin that study as strangers strangers to the human body and strangers to each other and we invariably finish as good friends to both I'm happy you haven't missed this rare opportunity And someday when you're really old twenty thirty forty years after you graduate when you've achieved your goals and you are a practicing healthcare professional you will have occasion to get a whiff of formaldehyde and that will cause you to remember You'll remember the Anatomy Lab the names of your lab partners and instructors and your donor body And you'll reflect on what is called the music of the Anatomy Laboratory the sound of learning the sound of discovery the sound of students teaching other students all throughout the room And you will recall that lovely aroma in the lab And here's the thing when you remember you will smile I promise you will
