Crossing the River Carol Smith, 2021-05-04 A powerful exploration of grief and resilience following the death of the author's son that combines memoir, reportage, and lessons in how to heal. Everyone deals with grief in their own way. Helen Macdonald found solace in training a wild goshawk. Cheryl Strayed found strength in hiking the Pacific Crest Trail. For Carol Smith, a Pulitzer Prize-nominated journalist struggling with the sudden death of her seven-year-old son, Christopher, the way to cross the river of sorrow was through work. In *Crossing the River*, Smith recounts how she faced down her crippling loss through reporting a series of profiles of people coping with their own intense challenges, whether a life-altering accident, injury, or diagnosis. These were stories of survival and transformation of people facing devastating situations that changed them in unexpected ways. Smith deftly mixes the stories of these individuals and their families with her own account of how they helped her heal. General John Shalikashvili, once the most powerful member of the American military, taught Carol how to face fear with discipline and endurance. Seth, a young boy with a rare and incurable illness, shed light on the totality of her son's experiences, and in turn helps readers see that the value of a life is not measured in days. *Crossing the River* is a beautiful and profoundly moving book, an unforgettable journey through grief toward hope, and a valuable, illuminating read for anyone coping with loss.

Tacit Dimensions of Pedagogy Bosse Bergstedt, Anna Herbert, Anja Kraus, Christoph Wulf, 2012 There is a controversy regarding the relationship between theory and praxis in the field of pedagogy, with no final decision on how to model it. From our perspective, theories concerning educational science are especially promising if they face the challenges associated with diverse educational practices and their special circumstances. As the central task, we consider the development of a notion of the explicit as well as of the tacit side of practices and of the necessity to reflect these two. Looking at educational practices is not reduced to the explicit decisions concerning aims, subjects, schedules, social settings, etc. in the diverse pedagogical fields. It also entails the examination of the inexplicable knowledge on which social relations are based. Aesthetical dimensions of education, like sensual perceptions and time-space-object relations, then are important frames of the practical orientation. Furthermore, corporal dispositions and influences of non-formal learning on formal learning situations are explored. The incidental scenery formed by these tacit factors might open and broaden or it might also close and restrict the significant ways of teaching and learning; it might empower learners and teachers in understanding

transcending and creating the world or constrain them in doing this **Secrets to Success for Science Teachers** Ellen Kottler,Victoria Brookhart Costa,2009-03-17 Provides teachers with practical ideas and strategies for promoting inquiry building literacy implementing technology and achieving meaningful instruction in the science classroom **The Online Learning Handbook** Alan (Senior Lecturer Jolliffe,2012-12-06 A guide to developing Web based learning materials It provides advice tools and techniques to help readers harness the potential of on line methods of instruction and education Taking a simple step by step approach it proceeds from the basics through to operating computer managed learning
