## **United Nations World Development Report:**

**The United Nations World Water Development Report 3** World Water Assessment Programme, 2012-05-23 The United Nations World Water Development Report published every three years is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources. It offers best practices as well as in-depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector. It is the only report of its kind resulting from the collaboration and contributions of the 26 UN agencies commissions, program funds, secretariats and conventions that have a significant role in addressing global water concerns. The news media are full of talk of crises in climate change, energy and food and troubled financial markets. These crises are linked to each other and to water resources management. Unresolved, they may lead to increasing political insecurity and conflict. Water is required to meet our fundamental needs and rising living standards and to sustain our planet's fragile ecosystems. Pressures on the resource come from a growing and mobile population, social and cultural change, economic development and technological change. Adding complexity and risk is climate change with impacts on the resource as well as on the sources of pressure on water. The challenges, though substantial, are not insurmountable. The Report shows how some countries have responded. Progress in providing drinking water is heartening with the Millennium Development Goal target on track in most regions. But other areas remain unaddressed and after decades of inaction the problems in water systems are enormous and will worsen if left unattended. Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity. Leaders in government, the private sector and civil society determine these objectives and allocate human and financial resources to meet them. Recognizing this responsibility, they must act now. **World Development Report 2008** World Bank, 2007-10-15 The world's demand for food is expected to double within the next 50 years while the natural resources that sustain agriculture will become increasingly scarce, degraded and vulnerable to the effects of climate change. In many poor countries, agriculture accounts for

at least 40 percent of GDP and 80 percent of employment At the same time about 70 percent of the world's poor live in rural areas and most depend on agriculture for their livelihoods World Development Report 2008 seeks to assess where when and how agriculture can be an effective instrument for economic development especially development that favors the poor It examines several broad questions How has agriculture changed in developing countries in the past 20 years What are the important new challenges and opportunities for agriculture Which new sources of agricultural growth can be captured cost effectively in particular in poor countries with large agricultural sectors as in Africa How can agricultural growth be made more effective for poverty reduction How can governments facilitate the transition of large populations out of agriculture without simply transferring the burden of rural poverty to urban areas How can the natural resource endowment for agriculture be protected How can agriculture's negative environmental effects be contained This year's report marks the 30th year the World Bank has been publishing the World Development Report

**World Development Report 2013** World Bank, 2012-10-15 Jobs provide higher earnings and better benefits as countries grow but they are also a driver of development Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children Efficiency increases as workers get better at what they do as more productive jobs appear and less productive ones disappear Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict Jobs are thus more than a byproduct of economic growth They are transformational they are what we earn what we do and even who we are High unemployment and unmet job expectations among youth are the most immediate concerns But in many developing countries where farming and self employment are prevalent and safety nets are modest are best unemployment rates can be low In these countries growth is seldom jobless Most of their poor work long hours but simply cannot make ends meet And the violation of basic rights is not uncommon Therefore the number of jobs is not all that matters jobs with high development payoffs are needed Confronted with these challenges policy makers ask difficult questions Should countries build their development strategies around growth or should they focus on jobs Can entrepreneurship be fostered especially among the many microenterprises in developing countries or are entrepreneurs born Are greater investments in education and training a prerequisite for employability or can skills be built through jobs In times of major crises and structural shifts should jobs not just workers be protected And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries The World Development Report 2013 Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development not as derived labor demand and by considering all types of jobs not just formal wage employment The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries depending on their levels of development endowments demography and institutions Policy fundamentals matter in all cases as they enable a vibrant private sector the source of most jobs in the world Labor policies can help as well even if they are less critical than is often assumed Development

policies from making smallholder farming viable to fostering functional cities to engaging in global markets hold the key to success *Shaping the Developing World* Andy Baker, 2013-08-16 Why are some countries rich and others poor *Shaping the Developing World* explores the different theories that attempt to answer this thorny question Interdisciplinary in his scope Andy Baker adeptly uses a threefold framework of the West the South and the Natural World to categorize and analyze the factors that cause underdevelopment from the consequences of colonialism deficient domestic institutions and gender inequality to the effects of globalization geography and environmental degradation Students learn to think like social scientists while coming to understand the full breadth of influences on a nation's political economic and social development Country case studies at the end of each chapter offer an ideal testing ground for the threefold framework as they apply empirical data to the various explanations of underdevelopment Critical thinking questions then encourage students to weigh the different theoretical arguments A series of well designed features develop students understanding of indicators of development concepts and highlight various kinds of aid organizations and opportunities for development work in the field *Shaping the Developing World* presents high quality academic analysis and the latest scholarship in a format that's engaging informative and above all accessible **Implementing Sustainable Development** Claudia María Vargas, Phillip J.

Cooper, 2024-11-25 Despite all the talk of sustainability there has not been enough action to halt or reverse the impacts of climate change Decades after the Rio Earth Summit and despite the many policies and commitments to move toward sustainable development there continues to be a serious implementation gap *Implementing Sustainable Development* focuses on the challenges of turning international commitments and policy promises into local action Through global examples and cases the authors examine not only the core principles but also successful and failed efforts to address the social environmental and economic dimensions of sustainable development They systematically guide readers through the technical legal economic administrative political ethical and cultural feasibility of putting sustainable development solutions in place Based on broad research Claudia María Vargas and Phillip J Cooper offer a practical and useful approach to identifying and addressing policy implementation challenges what works what doesn't and why Features of this thoroughly revised second edition include Dozens of case studies from the throughout the world An overview of the UN Sustainable Development Goals Action oriented solutions to the challenges of sustainable development Careful consideration of local and indigenous knowledge Key issues of equity equality and the importance of community involvement World Development Report, 1991 This report synthesizes and interprets the lessons of more than forty years of development experience Together with last year's report on poverty and next year's on the environment it seeks to provide a comprehensive overview of the development agenda The 1990s began with dramatic changes as many countries in Eastern Europe and elsewhere initiated ambitious reforms of their economic and political systems Against the backdrop of these transitions this report links the historical debates that counseled policymakers in their past decisions the lessons of experience and the evolving thought on

how best to proceed One of the most valuable lessons relates to the interaction between the state and the market in fostering development It describes a market friendly approach in which governments allow markets to function well and in which governments concentrate their interventions on areas in which markets prove inadequate The report looks at four main aspects of the relationship between governments and markets a investing in people b the climate for enterprises to flourish c the integration of countries with the global economy and d a stable macroeconomic foundation for sustained progress The report stresses that above all the future of developing countries is in their own hands Domestic policies and institutions hold the key to successful development *World Development Report 2011* ,2011-05-26 Rapporten unders ger forandringer i voldelige konflikter i det 21 rhundrede og fremh ver de negative p virkninger som gentagne voldshandlinger har haft p lande og regioners udviklingsmuligheder World Development Report 1989 World Bank,1989 This is the twelfth in the annual series assessing major development issues Economic growth rates among the developing countries have varied considerably The external environment has had an adverse impact on growth but domestic policies have been more important Countries striving to adjust their economies have had considerable success reducing external imbalances but less success with internal balance In the absence of large inflows of foreign capital countries will need to rely on the mobilization of domestic financial resources The structure of a country s financial system reflects its economic philosophy the present financial structure of many developing countries reflects their approach to development in the 1960s and 1970s an approach that emphasized government intervention in the economy Today many countries are revising their approach to rely more heavily on the private sector For the financial sector this implies a smaller role for government in the allocation of credit determination of interest rates and the daily decisionmaking of financial intermediation Relaxation of these controls calls for an effective system of prudent regulation and supervision Hence while the objective is an open market countries should not remove all capital controls until other economic and financial reforms are in place *World Development Report 2012* World Bank,2011-09-01 This year s World Development Report looks at facts and trends regarding the various dimensions of gender equality in the context of the development process **The United Nations Development Strategy Beyond 2015** United Nations.
