Telemedicine in Low-Resource Settings Richard Wootton, 2015-04-24 Telemedicine networks to support healthcare workers in resource limited settings often for humanitarian purposes have evolved over the last decade or so in a largely autonomous way Communication between them has been informal and relatively limited in scope This situation could be improved by developing a comprehensive approach to the collection and dissemination of information A recent review identified seven telemedicine networks each of which had been in operation for at least five years and which provided store and forward telemedicine services to doctors in low and middle income countries These networks provide clinically useful services and improved healthcare access However like much of telemedicine the formal evidence for their cost effectiveness remains weak Topics of current research interest therefore include the cost effectiveness of telemedicine in resource limited settings Outcomes data and methods for gathering it such as patient quality of life following a telemedicine episode the knowledge gain of healthcare staff involved in telemedicine and staff recruitment and retention in rural areas are also of interest Finally there is little published information about the performance of these telemedicine networks and methods for measuring it about how best to manage them and about how to share resources between them A collection of articles reporting the current evidence supporting the use of telemedicine in resource limited settings would build the evidence base and should provide a focus for future research It would also serve to raise the profile of this potentially important research field

Advanced Learning and Teaching in Higher Education in India: A Policy-technology-capacity Enabled Approach Pallavi Tyagi, Neha Zaidi, Balamurgan Balusamy, Celestine Iwendi, 2024-04-12 This book comprehensively covers the evolution of advanced learning pedagogy and

innovative technologies like open educational resources and blended learning models. It specifically talks about the future of technology enhanced learning and how advanced technology and government policies together are trying to impact learning outcomes globally. Nowadays in a flexible learning environment, technology plays a significant role in higher education systems. Both educators and students are playing prominent roles in its successful implementation. Advanced learning pedagogy by using technology has not only changed teaching procedures but has also evolved the relationship among multiple stakeholders. The content of the book is neatly segregated into four parts. Part I covers the concept and evolution of digital learning and education technology. This part examines the role of technology in higher education and proposes a toolkit for personalized learning and continuous assessment. Parts II and III creatively represent the innovative teaching techniques and learning models under advanced learning pedagogy. Chapters under parts II and III are specially designed to present the more simplistic view of various technology based advanced learning models and resources like flipped classes, gaming designs for e-learning, etc. Part III of the book also extensively covers various case studies, instructor's stories of technology enabled learning experiences. Part IV focuses on the evaluation of advanced learning pedagogy and tools. It also covers the future of information in learning like formative analytics and improved learning outcomes using technology and government initiatives in the form of various future oriented education policies like the Digital Action Education Plan 2021-2027. The wide ranging content also covers the challenges of implementation of advanced learning pedagogy and offers recommendations to overcome such challenges. The book will grab the attention of the modern IT enabled instructor's fraternity and students and researchers in the area of technology and education. The book can be further used by policymakers and educational technology startups to formulate and design technology based higher education teaching policies and procedures which are indeed helpful in measuring learning outcomes.
