Introduction to Marketing

Introduction

The term Marketing is derived from the Latin word 'Mercatus' which refers to "a place where business is conducted".

Marketing is a form of communication between a business house and its customers with the goal of selling its products or services to them. Goods are not complete products until they are in the hands of customers. Marketing is that management process through which goods and services move from concept to the customer. Dr. Philip Kotler defines marketing as "the science and art of exploring, creating and delivering value to satisfy the needs of a target market at a profit. Marketing identifies unfulfilled needs and desires. It defines, measures and quantifies the size of the identified market and the profit potential. It pinpoints which segments the company is capable of serving best and it designs and promotes the appropriate products and services." Thus, marketing refers to all the activities involved in the creation of place, time, possession and awareness utilities and beyond.

Meaning of Marketing.
