University Of Limpopo Application 2015:

Culture, philosophies and reforms in public administration for the globalizing world Edwin O.C. Ijeoma, Ogochukwu I. Nzewi, 2018-12-31 The aim of this scholarly collected work is to contribute to the scientific discourse on public administration in a globalised environment. The book reflects on governance challenges in South Africa and in Africa with its point of departure being the master narratives, the so-called grand debates such as New Public Management and specifically the role of technology. It also reflects on the so-called middle range discourses concerning organisational level issues in government, e.g. leadership and work procedures and explores new solutions to old governance challenges like corruption and service delivery. The uniqueness of this collected work lies in its ability to reflect on existing philosophies and practices in an innovative way. Through its multidisciplinary lens, the book opens up a new vision for the future of public administration in the South African context and on the African continent, not neglecting the current local, regional and global environment. Until recently, globalisation was considered an entrenched world order, but international political events during the course of the past few years have resulted in one of the biggest challenges to its endurance in recent history. This includes developments such as the successful referendum in Britain to exit the European Union, highlighting the growth of a severe nationalist and protectionist agenda that may be a signal of the unravelling of the current globalism world order. These developments inspire deeper interrogation of the challenges to effective public administration globally and the ripple effects in South Africa and Africa as a whole. Pointedly, it is evident that ensuring the voice of citizens in policy decision making remains a critical governance challenge. On the policy front, there are perennial challenges of land reform, service delivery and poverty, while on the governance front, corruption has metastasised with a growing culture of impunity and lack of accountability in leadership. In the midst of growing corruption and more than 20 years into democracy, South Africa's income inequality remains one of the highest in the world. This setting constitutes the context of the research outcome published in this scholarly work.

Advances in Production, Logistics and Traffic Uwe Clausen, Sven Langkau, Felix Kreuz, 2019-02-25 The series of Interdisciplinary Conferences on Production Logistics and Traffic (ICPLT) address the research community as well as practitioners in these fields with special attention to links and interfaces between the three disciplines. The fourth ICPLT in particular deals with technology from intralogistics to automated trucking driving as well as the societal aspects of commercial transport. To contribute to a high level and beneficial exchange between authorities in politics and municipalities with researchers and practitioners in production and logistics management, the ICPLT has asked for contributions from the three disciplines to better understand innovative technologies, best practises and latest results. These contributions have been evaluated and selected based on a double blind review process to become part of this book. It comprises 21 contributions examining trends and challenges for commercial transport as the essential link for production logistics and society. Therefore, innovative technologies and strategies are presented and discussed to better understand the interdependencies, conflicts of

interest and to develop feasible solutions Topics Simulation Optimization in Production and Logistics Freight Transport Demand Modelling Intralogistics Logistics Facilities Policy Human Factors Production Maintenance Supply Chain Management Sustainable Logistics Energy Target Groups Representatives of public authorities municipalities politics Actors of sectoral transport spatial planning Actors of production logistics Researchers in the disciplines production logistics transport spatial planning *Annual Report ...* South Africa.
