Unstoppable Global Warming Every 1500 years updated And Expanded Edition:

Unstoppable Global Warming Fred Singer, Dennis T. Avery, 2007 The author provides scientific evidence that the fifteen hundred year global warming cycle that has always controlled the earth's climate is the primary factor in the current warming trend

Unstoppable Global Warming Fred Singer, Dennis Avery, 2006-09-13 Singer and Avery present in popular language supported by in depth scientific evidence the compelling concept that global temperatures have been rising mostly or entirely because of a natural cycle Using historic data from two millennia of recorded history combined with the natural physical records found in ice cores seabed sediment cave stalagmites and tree rings Unstoppable Global Warming argues that the 1500 year solar driven cycle that has always controlled the earth's climate remains the driving force in the current warming trend Trillions of dollars spent on reducing fossil fuel use would have no effect on today's rising temperatures The public policy key Singer and Avery propose is adaptation not fruitless attempts at prevention Further they offer convincing evidence that civilization's most successful eras have coincided with the cycle's warmest peaks With the added benefit of modern technology humanity can not only survive global climate change but thrive

Unstoppable Global Warming Siegfried Fred Singer, 2008 In this timely book Singer and Avery present what they maintain are the many fallacies associated with the hysterical claims of dangerous climate change and unsubstantiated computer projections surrounding the theory of human caused global warming They make the case for the existence of a solar induced 1500 year cycle that generates warming and cooling of the Earth's temperature irrespective of the atmospheric concentration of greenhouse gases Singer and Avery argue that natural variations rather than human emitted greenhouse gases have tended to control the climate They provide an exhaustive list of scientific references mostly from refereed journals

Unstoppable global warming : every 1500 years Siegfried Fred Singer, Dennis T. Avery, 2008

The Discovery of Global Warming Spencer R. Weart, 2008-10-31 In 2001 an international panel of climate scientists declared that the world was warming at a rate without precedent during at least the last two millennia How scientists reached that conclusion is the story Weart tells in *The Discovery of Global Warming* The award winning book is now revised and expanded to reflect the latest science
