Numeracy as Social Practice Keiko Yasukawa,Alan Rogers,Kara Jackson,Brian V. Street,2018-05-01 Learning takes place both inside and outside of the classroom embedded in local practices traditions and interactions But whereas the importance of social practice is increasingly recognised in literacy education Numeracy as Social Practice Global and Local Perspectives is the first book to fully explore these principles in the context of numeracy The book brings together a wide

range of accounts and studies from around the world to build a picture of the challenges and benefits of seeing numeracy as social practice that is as mathematical activities embedded in the social cultural historical and political contexts in which these activities take place Drawing on workplace community and classroom contexts Numeracy as Social Practice shows how everyday numeracy practices can be used in formal and non formal maths teaching and how in turn classroom teaching can help to validate and strengthen local numeracy practices At a time when an increasingly transnational approach is taken to education policy making this book will appeal to development practitioners and researchers and adult education mathematics and numeracy teachers researchers and policy makers around the world Inside the Mathematics Class Uwe

Gellert,Christine Knipping,Hauke Straehler-Pohl,2018-09-26 This volume is a forward looking intersection of Sociological perspectives on mathematics classrooms and socio political perspectives on mathematics education The first perspective has generated a substantial body of knowledge in the mathematics education Interactionist research has deepened our understanding of interaction processes socio mathematical norms and the negotiation of meaning generating a micro sociology or a micro ethnography of the mathematics classroom More recently socio political perspectives on mathematics education interrelate educational practices in mathematics with macro social issues of social equity class and race and with the policies that regulate institutionalized mathematics education This book documents strings together and juxtaposes research that uses ethnographical classroom data to explain on the one hand how socio political issues play out in the mathematics class On the other hand it illuminates how class race etc affect the micro sociology of the mathematics classroom The volume advances the knowledge in the field by providing an empirical grounding of socio political research on mathematics education and it extends the frame in which mathematical classroom cultures are conceived *International Conference on Education and Management Science (ICEMS2014)* ,2014-09-24 2014 International Conference on Education and Management Science ICEMS2014 will be held in Beijing China on August 19 20 2014 The main purpose of this conference is to provide a common forum for researchers scientists and students from all over the world to present their recent findings ideas developments and application in the border areas of Education and Management Science It will also report progress and development of methodologies technologies planning and implementation tools and standards in information systems Education is an internal topic It is a process of delivering knowledge in a basic meaning Humans are hard to define the actual definition of education But it is the key point for our society to step forward Management science is the discipline that adapts the scientific approach for problem solving to help managers making informed decisions The goal of management science is to recommend the course of action that is expected to yield the best outcome with what is available

Appreciation SEAA 2022 was held on June 24-26, 2022 in Chengdu, China. It aims to encourage exchange of information on research frontiers in different fields, connect the most advanced academic resources in China and abroad, turn research results into industrial solutions, bring together talents, technologies and capital to boost development. The purpose of the conference is to provide an international platform for experts, scholars, engineers and technicians and technical R & D personnel engaged in related fields such as Science, Education and Art Appreciation to share scientific research results, broaden research ideas, collide with new ideas and strengthen academic research and to explore the key challenges and research directions faced by the development of this field and promote the industrialization cooperation of academic achievements. Experts, scholars, business people and other relevant personnel from universities and research institutions at home and abroad are cordially invited to attend and exchange.

Science on the Ropes Carlos Elías, 2019-05-15 In this controversial essay Carlos Elías addresses the worldwide phenomenon that is threatening the scientific and economic progress of Western countries. The rise and influence of magic and irrationality in the media, in social networks and at universities is a disturbing phenomenon; many Western students no longer want to pursue STEM (Science, Technologies, Engineering and Math) careers. This lucid and well-written book addresses one of the key issues of public debate: the deteriorating state of science in Western countries and their governments and its rise in Asian countries. The author compares two distinct models: the Spanish or Latin model which closed the door on science with the Counter Reformation and that employed by a second group of countries where science was encouraged. Elías suggests that a similar development could now be taking place between Western countries where the press, television and social science academics are becoming increasingly critical towards science and Asia where most prime ministers and other politicians are scientists or engineers. This book is intended for STEM educators both at secondary schools and universities, scientists and academics interested in scientific culture in the era of fake news.

Enhancing Teaching and Learning in the Dutch Vocational Education System Elly de Bruijn, Stephen Billett, Jeroen Onstenk, 2017-02-23 This book discusses how the Dutch vocational education system has undergone significant waves of reform driven by global imperatives, national concerns and governmental policy goals. Like elsewhere, the impetuses for these reforms are directed to generating a more industry-responsive, locally accountable and competence-based vocational education system. Each wave of reforms, however, has had particular emphases and is directed to achieve particular policy outcomes. Yet they are more than mere versions of what had or is occurring elsewhere. They are shaped by specific national imperatives, sentiments and localised concerns.

Consequently whilst this book elaborate what constitutes the contemporary provision of vocational education in the Netherlands also addresses a broader concern of how vocational education systems become formed manifested within nation states and then are transformed through particular imperatives institutional arrangement and localised factors So the readers of this book whilst learning much about the Dutch vocational education system will also come to identify and engage with a selection of contributions that inform factors that situate shape and transform vocational education systems Such a focus seems important given an era when there are concerns to standardise and make uniform educational provisions often for administrative or political imperatives As such this book will be of interest not only to those who are engaged in the field of vocational education but those with an interest in educational policy practice and comparative studies **Mathematics**
