Decision Science and Technology is a compilation of chapters written in honor of a remarkable man Ward Edwards Among Ward s many contributions are two significant accomplishments either of which would have been enough for a very distinguished career First Ward is the founder of behavioral decision theory This interdisciplinary discipline addresses the question of how people actually confront decisions as opposed to the question of how they should make decisions Second Ward laid the groundwork for sound normative systems by noticing which tasks humans can do well and which tasks computers should perform This volume organized into five parts reflects those accomplishments and more The book is divided into four sections Behavioral Decision Theory examines theoretical descriptions and empirical findings about human decision making Decision Analysis examines topics in decision analysis Decision in Society explores issues in societal decision making The final section Historical Notes provides some historical perspectives on the development of the decision theory Within these sections major multi disciplinary scholars in decision theory have written chapters exploring some very bold themes in the field as an examination of the book s contents will show The main reason for the health of the Decision Analysis field is its close links between theory and applications that have characterized it over the years In this volume the chapters by Barron and Barrett Fishburn Fryback Keeney Moreno Pericchi and Kadane Howard Phillips Slovic and Gregory Winkler and above all von Winterfeldt focus on those links Decision science originally developed out of concern with real decision problems and applied work such as is represented in this volume will help the field to remain strong Holt Biology: The environment, 2003 Ate Wh Holt Rinehart & Winston, 2000 The American Review of Reviews Albert Shaw, 1914 World Geography Phillip Bacon, 1989 **Book Review Digest**, 1996
