

The background of the cover is a composite image. In the upper half, a ship, possibly a minesweeper or a small transport, is shown on the water. It has a complex superstructure with various antennas and equipment. The number '13' is visible on its side. In the lower half, a biplane is shown on a muddy or sandy beach. The biplane is dark-colored with light-colored wings. The number '16' is on the tail, and 'ECCY.' is on the fuselage. The title text is overlaid on the ship portion of the image.

Library Services Division,1960 Musical Colours Ian Pearson,Jack Kopstein,2022-01-31 On the cover of the 1970 record THE VANISHING REGIMENTS Colonel CH Jaeger OBE made an interesting observation Be it true or not that old soldiers never die but only fade away it is absolutely certain that the music connected with soldiering never does in fact Many famous Regiments in the last few years have passed off the scene others have been amalgamated Much of the music of former Regiments is still in use though the names of the Regiments concerned have vanished perhaps forever Regimental colours are the symbolic spirit of the regiment their marches are the musical spirit Their histories are sometimes older than the regiments themselves and very much guarded and cherished by them When you hear a regimental band play a march why that march This book is an attempt to cover the fascinating histories of military marches how and why regiments adopted them even those that have faded into history It will appeal to those interested in Regimental Marches of Canadian and United Kingdom Armed Forces Over 500 marches are covered with many band photos from across the centuries Also included are narratives of the composers Victoria Cross musicians and even words to many marches So get out the records crank up the volume and listen to the bands play their MUSICAL COLOURS while reading all bout them U.S. Air Services ,1942 Churchill's Menagerie Piers Brendon,2019-08-06 Winston Churchill was known for his great love for and admiration of animals In fact one of Churchill s key characteristics was his fascination with the animal kingdom creatures of all sorts were a crucial element throughout his life He was amused intrigued enchanted by and sometimes even besotted with a vast menagerie from his pet budgerigar dogs cats fish and butterflies to his own lion leopard and white kangaroos kept at London Zoo and even more unusual species Dwelling amid flora and fauna was Churchill s ideal form of existence The world would be better off if it were inhabited only by animals and he signed his boyhood letters home The Pussy Cat In this fascinating book Dr Piers Brendon looks deeper into Churchill s love of the animal kingdom and at how animals played such a large part in his everyday life We encounter the paradox of the animal loving hunter who hunts foxes yet keeps them as pets who likes fishing but loves fish along with the man who used analogies to animals time and time again in his speeches and writings The picture that emerges shows another side of the great man showcasing his wit wisdom and wayward genius from a different perspective and shedding new and fascinating light on his love of the animal kingdom *Striking the Hornets' Nest* Geoffrey L Rossano,Thomas Wildenberg,2015-10-15 Striking the Hornets Nest provides the first extensive analysis of the Northern Bombing Group NBG the Navy s most innovative aviation initiative of World War I and one of the world s first dedicated strategic bombing programs Very little has been written about the Navy s aviation activities in World War I and even less on the NBG Standard studies of strategic bombing tend to focus on developments in the Royal Air Force or the U S

Army Air Service This work concentrates on the origins of strategic bombing in World War I and the influence this phenomenon had on the Navy's future use of the airplane The NBG program faced enormous logistical and personnel challenges Demands for aircraft facilities and personnel were daunting and shipping shortages added to the seemingly endless delays in implementing the program Despite the impediments the Navy and Marine Corps triumphed over organizational hurdles and established a series of bases and depots in northern France and southern England in the late summer and early fall of 1918 Ironically by the time the Navy was ready to commence bombing missions the German retreat had caused abandonment of the submarine bases the NBG had been created to attack The men involved in this program were pioneers overcoming major obstacles only to find they were no longer needed Though the Navy rapidly abandoned its use of strategic bombing after World War I their brief experimentation directed the future use of aircraft in other branches of the armed forces It is no coincidence that Robert Lovett the young Navy reserve officer who developed much of the NBG program in 1918 spent the entire period of World War II as Assistant Secretary of War for Air where he played a crucial role organizing and equipping the strategic bombing campaign unleashed against Germany and Japan Rossano and Wildenberg have provided a definitive study of the NBG a subject that has been overlooked for too long
