Computational Intelligence Techniques for Trading and Investment Christian Dunis, Spiros Likothanassis, Andreas Karathanasopoulos, Georgios Sermpinis, Konstantinos Theofilatos, 2014-03-26 Computational intelligence a sub branch of artificial intelligence is a field which draws on the natural world and adaptive mechanisms in order to study behaviour in changing complex environments This book provides an interdisciplinary view of current technological advances and challenges concerning the application of computational intelligence techniques to financial time series forecasting trading and investment The book is divided into five parts The first part introduces the most important computational intelligence and financial trading concepts while also presenting the most important methodologies from these different domains The second part is devoted to the application of traditional computational intelligence techniques to the fields of financial forecasting and trading and the third part explores the applications of artificial neural networks in these domains The fourth part delves into novel evolutionary based hybrid methodologies for trading and portfolio management while the fifth part presents the applications of advanced computational intelligence modelling techniques in financial forecasting and trading This volume will be useful for graduate and postgraduate students of finance computational finance financial engineering and computer science Practitioners traders and financial analysts will also benefit from this book

Trading Currency Cross Rates Gary Klopfenstein, Jon Stein, 1993-08-30 For commodity traders and portfolio managers a practical hands on guide to profiting in today's growing international cross rate markets Cross rates trading is growing increasingly popular fueled in no small part by banks and multinationals seeking creative strategies for hedging currency risk and speculators seeking profits from interest rate plays and exchange rate moves Trading Currency Cross Rates is the passkey to this vastly profitable financial sector Written for the experienced trader moving into the currency futures and foreign exchange cash markets as well as for the corporate portfolio manager seeking to limit company exposure this professional guide covers the fundamentals of today's cross rates markets and delivers the step by step techniques needed to trade cross rates successfully Packed with charts and tables that apply over a broad range of international markets and currencies the guide Explains what cross rates are and profiles the different types that currently are traded Shows whether to trade on an agency or principal basis and how to avoid counterparty failure Covers the building blocks of currency valuation

and the best methods for forecasting moves in currency cross rates Reveals how to profitably trade exotic cross rates among currencies from the Pacific Rim and Middle East Explains how to cross over to the growing interbank currency market and which fundamental and technical analysis techniques specifically apply to it Discusses how to easily adapt any current trading system and its input to the profitable cash markets Featuring the expertise of a leading cross rates trading expert in a concise direct accessible format Trading Currency Cross Rates is the dependable single source guide to trading cross rates successfully

Select Topics of Econophysics Amit Sinha, 2024-11-04 Economics requires understanding and analyzing forces that bring buyers and sellers to a market place who then negotiate exchanges of goods and services based on a mutually agreeable price Economists have their own method of modeling whereby models are first conceived of some notion of economic and financial thinking before being empirically tested and anomalies are then recognized if the observed data is inconsistent with the hypothetical underpinning This is in inherent contradiction with the modeling approaches of physicists who develop their theories principle and laws after observing empirical data The awareness that physics can enlighten the understanding of human behavior and thus economics and the interest of physicists in applying their training and models to understanding the complexities of finance and economics led to the creation of a new field of study appropriately termed as Econophysics Selected Topics on Econophysics is a collection of essays on topics that enhance and enrich our understanding of economic modeling when the same rigor of modelling used by physicists is brought to developing financial and economic theories These articles include discussions on modeling bitcoins stock index modeling using geometric Brownian motion agent based modeling wealth distribution modeling as well as modeling related to fractal regression and chaotic processes This interdisciplinary book will interest researchers graduate students and professionals in the fields of economics finance as well as physics

Navigating the Factor Zoo Michael Zhang, Tao Lu, Chuan Shi, 2024-12-09 Bridging the gap between theoretical asset pricing and industry practices in factors and factor investing Zhang et al provides a comprehensive treatment of factors along with industry insights on practical factor development Chapters cover a wide array of topics including the foundations of quantamentals the intricacies of market beta the significance of statistical moments the principles of technical analysis and the impact of market microstructure and liquidity on trading Furthermore it delves into the complexities of tail risk and behavioral finance revealing how psychological factors affect market dynamics The discussion extends to the sophisticated use of option trading data for predictive insights and the critical differentiation between outcome uncertainty and distribution uncertainty in financial decision making A standout feature of the book is its examination of machine learning's role in factor investing detailing how it transforms data preprocessing factor discovery and model construction Overall this book provides a holistic view of contemporary financial markets highlighting the challenges and opportunities in harnessing alternative data and machine learning to develop robust investment strategies This book would appeal to investment management professionals and trainees It will also be of use to

graduate and upper undergraduate students in quantitative finance factor investing asset management and or trading

Stock Market Modeling and Forecasting

Xiaolian Zheng, Ben M. Chen, 2013-04-05 Stock Market Modeling and Forecasting translates experience in system adaptation gained in an engineering context to the modeling of financial markets with a view to improving the capture and understanding of market dynamics The modeling process is considered as identifying a dynamic system in which a real stock market is treated as an unknown plant and the identification model proposed is tuned by feedback of the matching error Like a physical system a financial market exhibits fast and slow dynamics corresponding to external such as company value and profitability and internal forces such as investor sentiment and commodity prices respectively The framework presented here consisting of an internal model and an adaptive filter is successful at considering both fast and slow market dynamics A double selection method is efficacious in identifying input factors influential in market movements revealing them to be both frequency and market dependent The authors present work on both developed and developing markets in the shape of the US Hong Kong Chinese and Singaporean stock markets Results from all these sources demonstrate the efficiency of the model framework in identifying significant influences and the quality of its predictive ability promising results are also obtained by applying the model framework to the forecasting of major market turning periods Having shown that system theoretic ideas can form the core of a novel and effective basis for stock market analysis the book is completed by an indication of possible and likely future expansions of the research in this area

Computational Intelligence

Kurosh Madani, Antonio Dourado Correia, Agostinho Rosa, Joaquim Filipe, 2012-02-18 The present book includes a set of selected extended papers from the second International Joint Conference on Computational Intelligence IJCCI 2010 held in Valencia Spain from 24 to 26 October 2010 The conference was composed by three co located conferences The International Conference on Fuzzy Computation ICFC the International Conference on Evolutionary Computation ICEC and the International Conference on Neural Computation ICNC Recent progresses in scientific developments and applications in these three areas are reported in this book IJCCI received 236 submissions from 49 countries in all continents After a double blind paper review performed by the Program Committee only 30 submissions were accepted as full papers and thus selected

for oral presentation leading to a full paper acceptance ratio of 13% Additional papers were accepted as short papers and posters A further selection was made after the Conference based also on the assessment of presentation quality and audience interest so that this book includes the extended and revised versions of the very best papers of IJCCI 2010 Commitment to high quality standards is a major concern of IJCCI that will be maintained in the next editions considering not only the stringent paper acceptance ratios but also the quality of the program committee keynote lectures participation level and logistics
