Water Efficiency in Buildings Kemi Adeyeye, 2014-03-03 This reference source on water efficiency in buildings provides comprehensive and up to date information Both multi disciplinary and practical it signposts current knowledge innovation expertise and evidence on an important subject which is high in the resource management debate Water Efficiency in Buildings a review of theory and practice is structured into five sections Policy People Building Design and Planning Alternative Water Technologies and Practical Examples Case Studies This final section of the book presents new and current practice as well as lessons learnt from case examples on the use of water saving technologies and user engagement Current evidence is vital for effective policy making The dynamic nature of issues around water resource management creates a higher need for robust and reliable data and research information that can inform policy and regulations This compendium provides a roadmap for researchers and building professionals on water efficiency as well as for policy makers and regulators The case studies and research presented fall within the water supply and demand spectrum especially those that focus on process efficiency resource management building performance customer experiences and user participation sustainable practises scientific and technological innovation The benefit and impact of the research is at the local and national level as well as in the global context

Sustainable Construction Processes Steve Goodhew, 2016-04-13 This book explores the concepts and practicalities that lead to sustainable construction It breaks new ground by providing the reader with the underlying principles of how to build sustainably and then assesses many of the tools required for the task From energy to materials and from procurement to operation all aspects play their part in turning a theoretically sustainable building project into a reality There are many guidelines for the designer on how to maximise the sustainability of buildings but this resource text supplements these by focusing on the construction and operational aspects of sustainable buildings as well as some of the more fundamental design related considerations Offers an excellent text for those learning to construct design and operate sustainable buildings Covers the drivers for sustainable construction definitions historical impacts climate change and global regional and individual responses enables the construction professional to achieve optimum solutions both in design process and the aftercare of buildings evaluates the effectiveness of different renewable technologies and provides guidance on the practicalities of their use Alerts the reader to future trends in this field

Metric Handbook Pamela Buxton, 2018-02-23 Significantly updated in reference to the latest construction standards and new building types Sustainable design integrated into chapters throughout Over half of the entire book has now been updated since 2015 Over 100 000 copies sold to successive generations of architects and designers This book belongs in every design office The Metric Handbook is the major handbook of planning and design data for architects and architecture students Covering basic design data for all the major building types it is the ideal starting point for any project For each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the

information and what regulations the designer needs to be aware of As well as buildings the Metric Handbook deals with broader aspects of design such as materials acoustics and lighting and general design data on human dimensions and space requirements The Metric Handbook is the unique reference for solving everyday planning problems Steel Designers' Manual SCI (Steel Construction Institute),2016-06-27 In 2010 the then current European national standards for building and construction were replaced by the EN Eurocodes a set of pan European model building codes developed by the European Committee for Standardization The Eurocodes are a series of 10 European Standards EN 1990 EN 1999 that provide a common approach for the design of buildings other civil engineering works and construction products The design standards embodied in these Eurocodes will be used for all European public works and are set to become the de facto standard for the private sector in Europe with probable adoption in many other countries This classic manual on structural steelwork design was first published in 1955 since when it has sold many tens of thousands of copies worldwide For the seventh edition of the Steel Designers Manual all chapters have been comprehensively reviewed revised to ensure they reflect current approaches and best practice and brought in to compliance with EN 1993 Design of Steel Structures the so called Eurocode 3

Climate Change and Sustainable Development Malcolm Dowden,2013-12-19 With the profile of environmental issues at an all time high this book provides a much needed examination of the related effects of these issues on the property industry Within the property industry at the moment it is difficult to assume an overview of these issues and to properly assess the implications of climate change for commercial property This is the first book that pulls together the different elements of climate change into one coherent argument explaining what needs to be done to ensure the future of the property market The main issues discussed are mitigation adaptation energy efficiency and property valuation in addition to providing informed commentary on the laws and practical guidance to practitioners Code for Sustainable Homes ,2009

Urban Stormwater and Flood Management Veeriah Jegatheesan,Ashantha Goonetilleke,John van Leeuwen,Jaya Kandasamy,Doug Warner,Baden Myers,Muhammed Bhuiyan,Kevin Spence,Geoffrey Parker,2019-04-02 This book brings together the experiences of engineers and scientists from Australia and the United Kingdom providing the current status on the management of stormwater and flooding in urban areas and suggesting ways forward It forms a basis for the development of a framework for the implementation of integrated and optimised storm water management strategies and aims to mitigate the adverse impacts of the expanding urban water footprint Among other topics it also features management styles of stormwater and flooding and describes biodiversity and ecosystem services in relation to the management of stormwater and the mitigation of floods Furthermore it places an emphasis on sustainable storm water management measures Population growth urbanisation and climate change will pose significant challenges to engineers scientists medical practitioners policy makers and practitioners of several other disciplines If we consider environmental and water engineers they will have to face challenges in designing smart and efficient water systems which are robust and resilient to overcome

shrinking green spaces increased urban heat islands damages to natural waterways due to flooding caused by increased stormwater flow This work provides valuable information for practitioners and students at both senior undergraduate and postgraduate levels

Housing and the Credit Crunch Great Britain. Parliament. House of Commons. Communities and Local Government Committee, 2009 In this report the Communities and Local Government Committee says the Government must stick to its long term house building targets despite the credit crunch but a greater proportion of the homes built should be social housing The Committee is concerned that the 975 million borrowed by the Government from its 2010 11 budgets to build social rented housing now is not new money and that the Government has been unable to say how that borrowing will be replaced The Committee urges the Department for Communities and Local Government to put pressure on the Treasury to ensure measures to revive the mortgage markets are implemented immediately increase construction of new social housing both to provide for housing need and as a means of maintaining capacity in the homebuilding industry whilst the market recovers accelerate refurbishment programmes for social housing acquire further social housing through the purchase of unsold stock and street properties consider the purchase of unsold family homes which have been on the market for more than a year encourage public sector bodies to make land available for the development of new homes The report also urges the Government to do more to help those at risk of repossession by considering sanctions against lenders who repossess too quickly and by doing more to protect tenants and homeowners from unscrupulous landlords An Office of Fair Trading recommendation for sale and rent back schemes should be implemented as a matter of urgency to protect the growing number of households falling behind in mortgage payments The Committee would like to see more done to support housing associations including increasing social housing grant where necessary

Sustainable Concrete Solutions Costas Georgopoulos, Andrew Minson, 2014-03-17 The challenges facing humanity in the 21st century include climate change population growth overconsumption of resources overproduction of waste and increasing energy demands For construction practitioners responding to these challenges means creating a built environment that provides accommodation and infrastructure with better whole life performance using lower volumes of primary materials less non renewable energy wasting less and causing fewer disturbances to the natural environment Concrete is ubiquitous in the built environment It is therefore essential that it is used in the most sustainable way so practitioners must become aware of the range of sustainable concrete solutions available for construction While sustainable development has been embedded into engineering curricula it can be difficult for students and academics to be fully aware of the innovations in sustainable construction that are developed by the industry Sustainable Concrete Solutions serves as an introduction to and an overview of the latest developments in sustainable concrete construction It provides useful guidance with further references to students researchers academics and practitioners of all construction disciplines who are faced with the challenge of designing specifying and constructing with concrete

The Environmental Design Pocketbook Sofie Pelsmakers, 2019-10-23 The Environmental Design Pocketbook

2nd ed places the information you need for sustainable low energy building design at your fingertips Packed with diagrams tools and tips it cuts through the complex mass of technical data and legislation that faces the designer and distils all the key guidance into a single reference that is quick easy to use and points to the facts figures and performance data that are most important This 2nd edition is now fully up to date with the latest Building Regulations Part L and F legislation England and Wales RIBA Plan of Work 2013 new information on the Green Deal and Zero Carbon and contains revised references and further reading sections throughout Whether used in the classroom office or on site the book guides the designer through the entire process from the fundamentals to the building details From future proofing for a changing climate to rainwater harvesting retrofit and zero carbon technologies the Pocketbook has got it covered

Integrated Sustainable Design of Buildings Paul Appleby, 2012-10-12 This book aims to provide a guide to members of design and masterplanning teams on how to deliver sustainable development and buildings cost effectively meeting current and emerging UK and international statutory and planning requirements The book sets out a clear and understandable strategy that deals with all aspects of sustainable design and construction and the implications for delivery costs saleability and long term operation The extensive scope includes all aspects of environmental social and economic sustainability including strategies to reduce carbon emissions and the impact of climate change

Australian Master Environment Guide Carolyn Uyeda, 2010 Australian Master Environment Guide was previously published by CCH Australia The Australian Master Environment Guide is a practical handbook designed for environmental managers health and safety managers business managers students and anyone who needs an overview of environmental best practice and law It contains information on key aspects of environmental management in industries such as techniques systems land development pollution chemicals energy waste water and biodiversity

Alternative Water Supply Systems Fayyaz Ali Memon, Sarah Ward, 2014-10-15 Owing to climate change related uncertainties and anticipated population growth different parts of the developing and the developed world particularly urban areas are experiencing water shortages or flooding and security of fit for purpose supplies is becoming a major issue The emphasis on decentralized alternative water supply systems has increased considerably Most of the information on such systems is either scattered or focuses on large scale reuse with little consideration given to decentralized small to medium scale systems Alternative Water Supply Systems brings together recent research into the available and innovative options and additionally shares experiences from a wide range of contexts from both developed and developing countries Alternative Water Supply Systems covers technical social financial and institutional aspects associated with decentralized alternative water supply systems These include systems for greywater recycling rainwater harvesting recovery of water through condensation and sewer mining A number of case studies from the UK the USA Australia and the developing world are presented to discuss associated environmental and health implications The book provides insights into a range of aspects associated with alternative water supply systems and an evidence base through case studies on potential

water savings and trade offs The information organized in the book is aimed at facilitating wider uptake of context specific alternatives at a decentralized scale mainly in urban areas This book is a key reference for postgraduate level students and researchers interested in environmental engineering water resources management urban planning and resource efficiency water demand management building service engineering and sustainable architecture It provides practical insights for water professionals such as systems designers operators and decision makers responsible for planning and delivering sustainable water management in urban areas through the implementation of decentralized water recycling Authors Fayyaz Ali Memon Centre for Water Systems University of Exeter UK and Sarah Ward Centre for Water Systems University of Exeter UK

Urban Planning for Healthy European Cities Rosalba D'Onofrio,Elio Trusiani,2018-02-23 This book investigates different aspects of the relationship between healthy cities and urban planning examining various best practices in Europe It uses the above as a starting point and investigates different aspects of healthy cities examining various best practices in Europe Capitalizing on ongoing trials the chapters identify the policies that underlie plans and projects that have caused positive changes in local communities in terms of the quality of life and safety of inhabitants From these best practices the book deduces criteria and guidelines for planning healthy and safe cities A Carbon Primer for the Built Environment Simon Foxell,2014-01-03 In a world increasingly concerned about the impact of carbon dioxide and other greenhouse gases in the atmosphere on global climate the A Carbon Primer for the Built Environment will provide an understanding of the science and the public policy and regulation intended to tackle climate change It will spell out the essential information needed for navigating through the growing regulatory maze with confidence The book will Provide an explanation of climate change why carbon has been targeted as the main culprit and how this will impact the working lives of architects Explain key concepts such as carbon footprinting contraction convergence concentration based targets the Energy Performance of Buildings Directive decarbonising supply and reducing energy demand as well as the relevance of relevant government targets and international agreements Suggest an overall framework for achieving the carbon reduction targets and the requirements that will place on building designers Outline requirements and common standards and codes providing guidance on compliance mechanisms Suggest and examine likely models for future practice The book will be essential reading for anyone wanting to familiarise themselves with the new landscape of carbon reduction in the built environment with a particular focus on building design It will also provide an accessible reference volume for information on particular policies terms and initiatives as well as key data and numbers that will assist initial carbon calculations Design in Modular Construction Mark Lawson,Ray Ogden,Chris Goodier,2014-02-24 Modular construction can dramatically improve efficiency in construction through factory production of pre engineered building units and their delivery to the site either as entire buildings or as substantial elements The required technology and application are developing rapidly but design is still in its infancy Good design requires a knowledge of modular production installation and interface issues and also an

understanding of the economics and client related benefits which influence design decisions Looking at eight recent projects along with background information this guide gives you coverage of generic types of module and their application vertical loading stability and robustness dimensional and spacial planning hybrid construction cladding services and building physics fire safety and thermal and acoustic performance logistical aspects such as transport tolerances and safe installation A valuable guide for professionals and a thorough introduction for advanced students

Making Use of Deleuze in Planning Gareth Abrahams,2016-10-04 Making Use of Deleuze in Planning translates and re creates some of Gilles Deleuze s most abstract philosophical concepts to form a new practicable planning assessment tool It shows what his philosophy can do for planning theory as well as planning assessment practice and in doing so sets out a pragmatic approach to Deleuzian studies one that helps form bridges between ontological problems and the problems found in professional practice It also breaks new ground in assessment methodology by challenging the essentialist ideas underpinning assessment methods like BREEAM and setting out and testing a new form of non essentialist assessment named SIAM The book argues that Deleuze s philosophy can be made useful to planning as long as one is prepared to adapt and re create his key ontological concepts to respond to the specific demands of the field

Imagining the Future City Sarah Bell,James Paskins,2013-11-18 London is one of the world s leading cities It is home to an extraordinary concentration and diversity of people industries politics religions and ideas and plays an important role in our highly globalised and tightly networked modern world What does the future hold for London Investigating any aspect of the city s future reveals a complex picture of interrelations and dependencies The London 2062 Programme from University College London brings a new cross disciplinary and highly collaborative approach to investigating this complexity The programme crosses departmental boundaries within the university and promotes active collaboration between leading academics and those who shape London through policy and practice This book approaches the question of London s future by considering the city in terms of Connections Things Power and Dreams

No Waste Uly Ma,2017-03-02 Sustainability is a critical issue for the construction industry In the short term sustainability is often seen as a must do item In the longer term all contractors will be seeing it as a source of competitive advantage Public sector construction infrastructure and other large projects such as the Thames Gateway and the Olympics in 2012 are all being driven down this route by pressure from Government Uly Ma s No Waste is an extremely practical guide to managing sustainability in construction that draws on input from all the related stakeholders the construction industry itself the clients designers and architects and the trades The book explores how the industry can transform itself from business as before to business as it should be from the micro level of good site practices to setting the right policies that drives a company onwards The text covers the management of sustainability and the accompanying CD ROM includes a wealth of material such as tool kits templates and activities that can be shared throughout the organisation and used for team meetings communication and training
