

Fig. 1
Ass. 1

AC LINE
VOLTAGE SELECTOR

Fig. 3
Ass. 2

We want to thank you for selecting the SL-1200, DIRECT DRIVE PLAYER SYSTEM. To receive optimum performance from this DIRECT DRIVE PLAYER SYSTEM, we recommend that you read these operating instructions carefully.

PARTS IDENTIFICATION OPERATION AND FUNCTION OF CONTROLS

(TURNTABLE SECTION)

AC LINE VOLTAGE (See Fig. 2)

Make sure that the AC line voltage selector is correct to your local voltage before connecting the AC power cord.

CAUTION

If your local voltage is different, please turn the AC line voltage selector to your local voltage.

ROTOR (See Fig. 1- 1)

This unit uses a direct drive motor. Therefore, the rotor, which is the rotating part of the motor, is connected directly to the turntable platter. The spindle of the motor and the shaft of the turntable platter are the same. For this reason, to maintain the high performance described in the specifications, it is not desirable to apply a large amount of external force to the rotor and the spindle of the motor. The rotor is, therefore, clamped securely to protect the delicate and important parts during transportation.

Be sure to remove these fittings (2) carefully, and save them for future use, as when, for example, the player must again be transported.

CAUTION

The rotor of the motor is constructed so that it cannot be removed, in order to maintain its high performance for a long time.

Do not attempt to remove the removal prevention fitting (3) for the rotor.

POWER SWITCH/SPEED SELECTOR (See Fig. 1- 4)

Set the "speed selector" to the desired position (33 or 45, depending upon the speed of the record to be played). The strobo illuminator will be lighted, and the turntable platter will rotate.

STROBO ILLUMINATOR (See Fig. 1- 5)

When the power switch/speed selector is on, the strobo illuminator is SL.

VARIABLE PITCH CONTROLS (See Fig. 1- 6)

Adjust the "variable pitch controls" if necessary. These are designed to provide adjustment of the selected speed by 10% range.

Select the speed of the turntable platter by setting the "power switch/speed selector" to the desired position. The rotating turntable platter, when illuminated by strobo illuminator, may show movement of the marks on the strobo disc. Adjust the "variable pitch controls" until the strobo marks are stationary.

After the necessary adjustment has been made, the speed will not change and re-adjustment will not be necessary.

The strobo marks molded around the turntable platter are used to check the correct speed of rotation for 50 Hz (European), and 60 Hz (U.S.A.). Adjust its rotation according to the strobo label.

SPEED ADJUSTMENT SCREWS (See Fig. 1- 7)

If, for any reason, the adjustment cannot be successfully made, use a (+) tip screwdriver to adjust the appropriate speed adjustment screw (33 or 45) located beneath the turntable platter.

Turning the speed adjustment screws to the right or left will increase or decrease the speed respectively.

STROBO MARKS (See Fig. 1- 8)

STROBO LABEL (See Fig. 1- 9)
