way **Philippines Foreign Policy and Government Guide Volume 1 Strategic Information and Developments** IBP, Inc,2013-08 2011 Updated Reprint Updated Annually Philippines Foreign Policy and Government Guide **Indigenous Technology Knowledge Systems** Mishack T. Gumbo,P. John Williams,2023-07-21 There has been a growing interest in indigenous knowledge systems and research This interest has been mainly triggered by the need to decolonize education as a response to the colonial onslaught on indigenous knowledge and people Research has however concentrated on the generality of the indigenous knowledge system rather than on its related dimensions One area that has suffered a lack of attention is indigenous conceptions of science technology engineering and mathematics STEM despite the unquestionable evidence of STEM in indigenous contexts Most STEM is presented by colonial establishments and representations especially in developed modern urban contexts which portray STEM as a colonial construct This book focuses on indigenous technological knowledge systems education ITKSE Indigenous people have been at the front of technological developments from pre colonial times The list of precolonial industries science and technology is extensive including blacksmithing wood carving textile weaving and dyeing leather works beadworks pottery making architecture agricultural breeding metal working salt production gold smithing copper smithing leather crafting soap making bronze casting canoe building brewing glass making and agriculture for example In some parts of the world such as Africa and Australia these technologies still exist ITKSE should not be left to exist outside of the technology education curriculum and classroom as it can benefit both indigenous students who have been denied learning about what is relevant to them and non indigenous students These cultural groups can expand their knowledge of technology by learning both ITKSE and Western technological knowledge systems education WTKSE ITKSE also presents opportunities for technology teachers to reflect on and revisit their depth of technological knowledge pedagogies and assessment The intent of this book is transformational in the sense that it brings decolonial and indigenous perspectives into the technology education context It extends technology education in the sense that it will not only influence Western minded architects artisans designers etc but encourage indigenous mindedness as well

Curriculum Development in Elementary Education Archie Moss,2019-03-21 The curriculum of elementary schools is a very important factor in the education of children Students need to understand and express themselves in a language which can be the Mother Tongue only at the elementary level Curriculum development is an important part of the education process ensuring that classes at all levels from early childhood to post secondary are best designed to help students be successful in learning the material and gaining the skills needed to continue to advance Evaluation essentially is the provision of information for the sake of facilitating decision making at various stages of curriculum development This information may pertain to the program as a complete entity or only to some of its components Evaluation also implies the selection of criteria collection and analysis of data It includes obtaining information for use in judging the worth of a programme and procedure It is a comprehensive term and transcends standardized tests covering all means of ascertaining

the results of construction A curriculum framework is an organized plan or set of standards or learning outcomes that defines the content to be learned in terms of clear definable standards of what the student should know and be able to do The supporters of learner centered Curriculum give importance to individual development and they wants to organize the curriculum according to the needs and interest of learners there are fundamental differences in this approach and the subject centered design The curriculum framers for elementary schools should also associate the parents and specialists while developing the curriculum for elementary education
