Engines must be identified by complete model number, including specification number in order to obtain correct repair parts. Numbers on early models are located on a name plate or tag. Numbers on later models are stamped in

blower housing. It is important to transfer ID tags from original engine to replacement short block so unit can be identified later.

Medium frame engines have aluminum blocks with cast iron sleeves.

Heavy frame engines have cast iron cylinder and block assemblies. Early VH70 and HH70 engines were identified as V70 and H70. Models VH and VM are vertical crankshaft engines and HM and HH models have horizontal crankshafts.
