Kaveh,R.K. Mueller,J.F. Greenleaf,2012-12-06 This volume constitutes the proceedings of the Thirteenth International Symposium on Acoustical Imaging which was held in Minneapolis Minnesota

during October 26-28, 1983. Forty-eight research papers were presented during the meeting by researchers from twelve countries again demonstrating the true international character of these meetings. Of these presentations, this volume contains forty-two complete manuscripts. The abstracts for additional papers that were not available at publication time are also included. According to the recent tradition of these symposia, an interdisciplinary program under the general theme of acoustical imaging was organized. This can clearly be observed from the wide range of topics and approaches contained in the following manuscripts. There are papers of mathematical nature dealing with the basis of image formation and algorithms for digitally carrying out specific imaging tasks. One finds manuscripts dealing with the design and construction of imaging transducers as well as complete imaging systems. Applications include medical imaging and nondestructive testing, seismic and underwater imaging. This volume therefore should be of interest to active researchers in acoustical imaging as a report on current research and to workers in signal processing, sonics and ultrasonics who are interested in exploring the diverse areas of application for their fields of interest. These proceedings are organized in seven topical sections paralleling the sessions of the conference. These are: Inversion and Tomography, Microscopy, Scattering and Propagation, Tissue and Material Characterization, Signal Processing, Transducers and Arrays, Imaging Systems and Special Techniques. **Review of**

**Progress in Quantitative Nondestructive Evaluation** Donald O. Thompson, 2013-11-11. This volume, Parts A and B, contains the edited papers presented at the annual Review of Progress in Quantitative Nondestructive Evaluation held at the University of California, San Diego, La Jolla, CA, on August 1-5, 1988. The Review was organized by the Center for NDE at Iowa State University and the Ames Laboratory of the U.S. Department of Energy in cooperation with the Air Force Materials Laboratory, the Office of Basic Energy Sciences, USDOE, the Office of Naval Research, the NASA Langley Research Center, and The Metallurgical Society, TMS. With a total of over 450 participants from the US and nine foreign countries who presented a record 325 papers, this conference has grown into the largest, most significant gathering of NDE researchers and engineers anywhere in the world. The meeting was divided into 36 sessions with as many as four sessions running concurrently. All stages of NDE development, from basic research investigations to early engineering applications and all methods of inspection science from ultrasonics to x-ray tomography, were covered. Following a pattern now familiar to regular attendees of the Review and readers of the Proceedings, the editors have organized the papers in the Proceedings according to topical subject headings rather than the original order of presentation. This rearrangement yields a more user-friendly reference work. Part A of the Proceedings treats NDE technique development, whereas Part B is organized around the theme of materials.
