

IN-TEXT CITATION: REFERENCING SOURCES WITHIN THE TEXT

Throughout the text of your paper you need to acknowledge the work used in your writing. Whenever you present a statement of evidence such as a quote, or when you use someone else's ideas, opinions or theories in your own words (paraphrasing), you must acknowledge the work(s) by providing the author's name and date of publication in text. An explanation of how to cite a work within your paper is given below and with each reference example in this guide.

If you use the name of the author(s) in your writing, place the year of publication of the work in parentheses after the author's name. This is known as a narrative in-text citation.

Mullane (2006) conducted research into the effect of. . .

If you refer to a work in the text of your paper and you are not using the author's name in your narrative, place the author's last name and the year of publication of the work in parentheses within or at the end of the sentence. This is known as a parenthetical in-text citation.

The research conclusively proved a correlation between the results (Mullane, 2006). A recent study (Wilson, 2015) shows the same correlation.

The choice between parenthetical and narrative in-text citation depends on the writer and the flow of the narrative.

If a paraphrase or summary continues over several consecutive sentences cite the work on first mention. It is not necessary to repeat the citation as long as it is clear to your reader that you are referring to the same work.

Fang (2017) has collected new data on the implementation of renewable technologies in Europe. Thirty-three percent showed an improvement in Gross Domestic Product (GDP) in the first 5 years. There was no negative impact on employment.

When a parenthetical in-text citation (with author and year) is used earlier in the paragraph, subsequent narrative mentions of the work in the same paragraph do not need to include the year. This rule only applies when the citation could not be confused with another in the paragraph and should only be used in instances when the name is given in the narrative, e.g.

Smith (2009) explained that. . . Smith also suggested. . .

Pay particular attention to the citation format required for references with multiple authors or editors. The use of *et al.* is used for three or more authors or editors. See examples for **two authors**, **three to twenty authors** and **twenty one and more authors**.

Cross-cultural Communication Thomas Warren,2017-03-02 Cross Cultural Communication is a collection of essays that examines how practitioners can improve the acceptance of their documentation when communicating to cultures other than their own The essays begin by examining the cross cultural issues relating to quality in documentation From there the essays look at examples of common documents analysing them from several perspectives Specifically the author uses communication theories such as Bernstein s Elaborated and Restricted Code theory and Marwell and Schmidt s Compliance Gaining theory to show how documents used by readers who are not native speakers of English can be written and organized to increase their effectiveness The principal assumption about how practitioners create their documents is that while large organizations can afford to write translate and then localize small to medium size organizations produce many documents that are used directly by people in other cultures often without translating and localizing The advantage the writer gains from these essays is in understanding the strategies and knowing the kinds of strategies to apply in specific situations In addition the essays can serve as a valuable resource for students and teachers alike as they determine ways to understand how cross cultural communication is different and why it makes a difference Not only do students need to be aware of the various strategies they may apply when creating documents for cross cultural settings they also need to see how research can apply theories from different areas in the case of these essays communication and rhetorical theories Another value of the essays is to show the students the role standards play in cross cultural communication standards are written by committees that follow style rules developed by the International Standardization Organization in Geneva Thus both students and practitioners can find valuable cross cultural communication advice in these essays
