**Education. Transforming Educational Practices with Technology** Kam Cheong Li, Tak-Lam Wong, Simon K.S.

Cheung, Jeanne Lam, Kwan Keung Ng, 2015-02-04 This book constitutes the refereed proceedings of the International Conference on Technology in Education ICTE 2014 held in Hong Kong in July 2014. The 18 revised full papers and 4 short papers presented were carefully reviewed and selected from 45 submissions. The papers are organized in topical sections on application of mobile technologies in e learning, technology advancement in e learning, systems innovations in e learning, pedagogy, open education and institution e learning policy. Telling Tales on Technology Neil Selwyn, 2020-04-22 This title was first published in 2002. The educational potential of information and communications technology (ICT) has been speculated upon endlessly from the early days of the micro computer to the present excitement surrounding virtual education and e learning. Now with current multi billion dollar initiatives such as the UK National Grid for Learning and US Technology Literacy Challenge, ICT is an unavoidable element of education. Yet despite a plethora of promises and policies, new technologies have failed to be wholly integrated into education. Telling Tales on Technology critically examines the role of ICT in education and explores how, given its assumed importance, new technology remains a peripheral part of much of what goes on in education. Based on in-depth qualitative studies, the book takes a comprehensive yet questioning look over the past two decades of educational technology policy and practice and positions it within the wider social, cultural, political and economic notion of the information age. Drawing on interviews with students, teachers, politicians and business people as well as comprehensive documentary analysis, this is an essential text for anyone thinking seriously about the use of ICT in education.
