Technopolopole Mtropole Lexemple Grenoble:

Local Resources, Territorial Development and Well-being Jean-Christophe Dissart, Natacha Seigneuret, 2020-01-31 Using empirical evidence this book argues for a more comprehensive view of the diversity of local resources and well being from a territorial perspective The first part of the book addresses the contrasting nature of local resources in connection with proximity and governance the ground the past cultural heritage sites the snow and energy Well being from multiple perspectives is examined in the second part shedding light on sociabilities vs income level accessibility for pedestrians health via urban design life course trajectories as indicators of quality of life and the connection between amenities and social justice

Planning and Design Perspectives for Land Take Containment Benedetta Giudice, 2022-01-03 This book aims to provide a framework for the concept of land take the practice by which natural lands are lost to artificial land development practices and present its ecological implications in urban environments In particular the book intends to contextualize land take and its ecological implications in the field of planning through the analysis of the evolution of the relationship that exists between ecology and urban and regional planning with case studies focusing on cities in Europe Urban and regional planning specifically in terms of tools policies and strategies play a central role in the redevelopment of this relationship and through this perspective the text explores some operational criteria and guiding strategies for the creation of innovative scenarios of planning and design The book is indeed mainly based upon an ecological planning oriented perspective with the attempt of creating a strong link between the plan and the project that will be useful for students researchers policy makers and urban planners and designers

Major French Cities facing Metropolization Alain Bourdin, 2024-05-27 This book characterizes a type of city i e the metropolis by using characteristics which have very little to do with its size It distinguishes between metropolises and megacities and defines these different characteristics by bringing together elements related to facilities accessibility and economic power on one hand and other elements which relate more to the capacity for innovation and more generally to the knowledge society and economy All of which demonstrate the process of metropolization as well as elements of daily life and more generally elements which relate to the urban experience To live in a metropolis is not only to benefit from more urban amenities but also to live in a different way in particular in a world which is much more diverse in every respect Based on a series of metropolization criteria constructed and discussed this book goes beyond ordinary statistical approaches to integrate the interterritorial scale of metropolitan systems as well as their qualitative dimension Following in Simmel s footsteps it shows that a city is also an atmosphere a mentality a spirit all of which are poorly captured by statistical data As such the book focuses on five major themes networks economic development social issues urban form and the ecological and digital transition The books makes an interesting read for urban planners sociologists planners and architects and all specialists working in this field
