

As the messages are sent, you will see status messages that show the progress and confirm the message is sent. Sometimes the connection to the e-mail service network will not be successful and the messages not sent will remain in your PENDING Mail-box.

Try again later or call your e-mail network service provider if the problem continues.

Receiving E-mail – When you receive e-mail after selecting **GET EMAIL** you will also see status messages displayed by TeleCommunicator. You will also see the number of messages being received. They will be stored automatically in the IN BOX Mail-box. If there is an error and the messages are not received properly, then the e-mail network service computer will keep the e-mail messages and send them again when you choose to GET MESSAGES again.

Using TeleCommunicator Facsimile Functions

TC- Fax or Alternative - The TeleCommunicator **FACSIMILE** application is designed to be simple and convenient and yet provide most of the commonly used functions for sending and receiving facsimile messages. It uses the **DIRECTORY** in TeleCommunicator to store and access facsimile phone numbers for people to whom you wish to send a facsimile. If you wish to have a more elaborate facsimile application for use on TeleCenter, or you wish to use a facsimile application that you are already familiar with, the alternative facsimile software must be installed on TeleCenter and TeleCommunicator configured in **UTILITIES** to link to this alternative application. You may also operate an alternative facsimile application separately from TeleCommunicator.

Set-up for TC-Fax - The **UTILITIES** – Function tab in TeleCommunicator which selects Facsimile applications must be set to TC-Fax or another facsimile program or no facsimile function will be operational in TeleCommunicator. Default settings may have been included by your Service Provider or supplier of TeleCenter.

Start TC-Fax - To use **FACSIMILE** in TeleCommunicator, press **FACSIMILE** on the right side of the MainScreen in the Application Panel. The TC-Fax screen will be displayed and will be very similar to the example below. Note that TC-Fax was designed to be very similar to TC-Mail in user-interface and operation. It includes the basic most used functions for sending and receiving facsimile messages.

View Fax-Boxes – The top right “Message-Box” are (1)a shows which of four facsimile Message-boxes is currently open (green button) to display the titles of facsimile messages stored there. You may touch any of these Message-Box labels to display the facsimile messages in the box.
