The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education

practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace s reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America s oldest public schools

Global Philosophy

Nicholas Maxwell, 2014-11-05 This book is about education learning rational inquiry philosophy science studies problem solving academic inquiry global problems wisdom and above all the urgent need for an academic revolution Despite this range and diversity of topics there is a common underlying theme Education ought to be devoted much more than it is to the exploration real life open problems it ought not to be restricted to learning up solutions to already solved problems especially if nothing is said about the problems that provoked the solutions in the first place A central task of philosophy ought to be to keep alive awareness of our unsolved fundamental problems especially our most fundamental problem of all encompassing all others How can our human world and the world of sentient life more generally imbued with the experiential consciousness free will meaning and value exist and best flourish embedded as it is in the physical universe This is both our fundamental intellectual problem and our fundamental problem of living The essays in this volume seek to provoke a concerted effort to transform our institutions of learning so that they become rationally and effectively devoted to helping us learn how to create a wiser world Our most serious problems of living are so grim so imbued with suffering wasted lives and unnecessary death that the idea of approaching them in a playful spirit seems sacrilegious We need to keep alive tackling of intellectual problems so that playful capacities can be exercised if for no other reason and other reasons there are of course aplenty There are two really worthy impulses behind all rational inquiry delight and compassion
