Subcommittee on Capital Markets, Insurance, and Government Sponsored Enterprises, 2003 Distributed to some depository libraries in microfiche *BIAN 2nd Edition - A framework for the financial services industry* BIAN eV, 2021-07-09 The Banking Industry Architecture Network BIAN is a global not for profit association of banks solution providers consultancy companies integrators and academic partners with the shared aim of defining a semantic standard for the banking industry covering all banking activity and almost all of the well known architectural layers BIAN s Reference Architecture for the Financial Industry provides its users with a set of building blocks that when used in different combinations can support all of the functionality and information a bank needs for both its internal functioning and its collaboration with partners in an Open Finance and Open API economy BIAN s Reference Architecture for the Financial Industry is freely available on the BIAN website This website also provides a wealth of information on both the theory and practice of the standard So why this book Importantly it summarizes all of the above information and guides the reader through it on a step by step basis It provides the reader with a thorough understanding of

BIAN's architecture and how it can be used to support an organization on its journey to becoming an agile business organization and developing an application platform BIAN is a semantic standard. It provides business building blocks and defines them in business terms. It provides a business view on both the business and application architectures. This second edition not only includes the more recent deliverables; it also takes a stepped approach through the different topics. It aims to be more appealing to a business audience by addressing the building blocks of BIAN and their possible use in business terms whilst also including many real life examples of BIAN's usage. As such, it should not only appeal to application and business architects but also to their managers, their business partners and other stakeholders who work closely with them. The first part of the book focuses on the theory: BIAN's organization, the principles and patterns on which its architecture is based and its building blocks. The second part of the book explains in methodology-independent terms how BIAN can be applied in different architectural layers by different disciplines in co-operation with architects. This part of the book includes a number of practical examples intended to improve the reader's understanding of the building blocks of the BIAN architecture and encourage them to apply it for the benefit of their own organization. The final part of the book should inspire the reader even further by clearly illustrating the synergy between the content that BIAN delivers and the architecture methodology provided by TOGAF.
