Hellenistic era from Aristotle through the end of the Roman Republic acknowledging that the political shift does not mark a sharp intellectual break The fourth section covers the Roman era from the late Republic through the transition to Late Antiquity The final section covers the era of Late Antiquity including the early Byzantine centuries The Handbook provides through each of its approximately four dozen essays a synthesis and synopsis of the concepts and models of the various ancient natural sciences covering the early Greek era through the fall of the Roman Republic including essays that explore topics such as music theory ancient philosophers astrology and alchemy The Oxford Handbook of Science and Medicine in the Classical World guides the reader to further exploration of the concepts and models of the ancient sciences how they evolved and changed over time and how they relate to one another and to their antecedents There are a total of four dozen or so topical essays in the five sections each of which takes as its focus the primary texts explaining what is now known as well as indicating what future generations of scholars may come to know Contributors suggest the ranges of scholarly disagreements and have been free to advocate their own positions Readers are led into further literature both primary and secondary through the comprehensive and extensive bibliographies provided with each chapter

Rhetoric and Religious Identity in Late Antiquity Richard Flower, Morwenna Ludlow, 2020-08-31 The topic of religious identity in late antiquity is highly contentious How did individuals and groups come to ascribe identities based on what would now be known as religion categorizing themselves and others with regard to Judaism Manichaeism traditional Greek and Roman practices and numerous competing conceptions of Christianity How and why did examples of self identification become established activated or transformed in response to circumstances To what extent do labels whether ancient and modern for religious categories reflect a sense of a unified and enduring social or group identity for those included within them How does religious identity relate to other forms of ancient identity politics for example ethnic discourse concerning barbarians Rhetoric and Religious Identity in Late Antiquity responds to the recent upsurge of interest in this issue by developing interdisciplinary research between classics ancient and medieval history philosophy religion patristics and Byzantine studies expanding the range of evidence standardly used to explore these questions In exploring the malleability and potential overlapping of religious identities in late antiquity as well as their variable expressions in response to different public and private contexts it challenges some prominent scholarly paradigms In particular rhetoric and religious identity are here brought together and simultaneously interrogated to provide mutual illumination in what way does a better understanding of rhetoric its rules forms practices enrich our understanding of the expression of late antique religious identity How does an understanding of how religious identity was ascribed constructed and contested provide us with a new perspective on rhetoric at work in late antiquity
