

Lignes 5, 6	Phrase longue, complexe avec des propositions relatives et circonstancielle.	Décrit avec précision une scène de rencontre romanesque que le lecteur peut facilement s'imaginer : 2 jeunes gens, réunis par le hasard et dont le destin est sur le point de basculer.
Lignes 7 à 9	Phrase longue, complexe	Phrase plus longue qui permet de décrire la métamorphose du jeune garçon innocent en amant passionné.
« si charmante »	Intensif + adjectif	Brosse un portrait très succinct de Manon : accent mis sur son charme dont la signification est double : jolie mais aussi ensorceleuse.
« sagesse, retenue » ≠ « enflammé tout d'un coup jusqu'au transport »	Phrases négatives, champ lexical de la timidité et champ lexical de la passion. Hyperbole pour le sentiment amoureux.	Le texte repose sur un balancement avant/après la rencontre : on passe du jeune homme timide à l'amoureux transi.
« me parut, moi, moi dis-je »	Répétition du pronom 1 ^{re} personne	Cette rencontre introduit une fracture dans la vie de DG, un point de bascule.
« tout d'un coup »	Adv de temps	Marque cette bascule : un seul instant modifie pour toujours l'ordre des choses.
Lignes 9 à 11	Fonctionnement identique : phrase longue, contraste entre le champ lexical de la timidité et celui de l'amour, focalisation sur la 1 ^{re} personne du sg	DG relate la métamorphose qui s'opère en lui à ce moment là.
« je me trouvais enflammé, je m'avançai vers la maîtresse de mon cœur ».	allitération en « m » + périphrase	Montre qu'il s'agit du DG qui raconte ici avec un voc de l'amour que le jeune homme ne possédait pas encore. La périphrase annonce déjà au lecteur le type de relations qui s'installera entre les deux amants.
Dans ce mouvement, DG nous fait le récit du moment qui a fait basculer sa vie dans une passion dévorante, nous décrivant de manière précise sa métamorphose en s'appuyant sur un récit tout en contraste, opposition entre Manon et le reste des femmes, opposition entre DG naïf et DG amant.		

Mouvement 3 : Ligne 12 à fin : Une annonce de la suite du roman.

Citations /Références	Procédés littéraires	Interprétation/effet produit
« quoiqu'elle fut... embarrassée »	Circonstancielle d'opposition.	Marque un nouveau contraste entre Manon et le narrateur. Manon est à l'aise en présence d'un inconnu qui l'aborde dans un lieu public. Les rôles sont inversés : DG est timide et Manon, malgré son jeune âge est « expérimentée » annonce là encore le type de relation qui se tissera entre les deux personnages.
« demandait, répondit ».	Verbes de paroles + subordonnée interrogative indirecte	La rencontre passe par la parole avec une restitution de leur dialogue au style indirect. Le passage par la scène semble arrêter le temps et restituer le plus précisément possible le moment vécu par Des Grieux.

train residual network for image classification matlab - Aug 03 2022

web to create and train a residual network suitable for image classification follow these steps create a residual network using the resnetlayers function train the network using the trainnetwork function the trained network is a dagnetwork object perform classification and prediction on new data using the classify and predict functions

image data workflows matlab simulink mathworks - Oct 05 2022

web image data workflows use pretrained networks or create and train networks from scratch for image classification and regression use transfer learning to take advantage of the knowledge provided by a pretrained network to learn new patterns in new image data

classify image using pretrained network matlab simulink - Feb 09 2023

web this example shows how to classify an image using the pretrained deep convolutional neural network googlenet googlenet has been trained on over a million images and can classify images into 1000 object categories such as

erstellen eines einfachen netzes zur bildklassifizierung matlab - Dec 27 2021

web erstellen eines einfachen netzes zur bildklassifizierung dieses beispiel veranschaulicht wie sie ein einfaches convolutional neural network für die deep learning klassifizierung erstellen und trainieren können convolutional neural networks sind wichtige werkzeuge für das deep learning und eignen sich vor allem für die bilderkennung

classify data using trained deep learning neural network matlab classify - Jul 14 2023

web y classify net mixed predicts the class labels using the trained network net with multiple inputs of mixed data types y scores classify also returns the classification scores corresponding to the class labels using any of

classify image using googlenet matlab simulink - Jan 08 2023

web this example shows how to classify an image using the pretrained deep convolutional neural network googlenet googlenet has been trained on over a million images and can classify images into 1000 object categories such as

neural network classifier file exchange matlab central - Sep 04 2022

web nov 16 2014 this code is written for image classification using matlab newff function you can refer crab classification which is given in matlab help this is a supervised classification technique appropriate training areas are selected for each class training should be given to the neural network using training areas

neural network code for image classification segmentation matlab - Apr 30 2022

web aug 28 2015 i have written a code in matlab for neural network classification segementation the image after train the image but it is not working as

create simple image classification network matlab - Aug 15 2023

web define the convolutional neural network architecture specify the size of the images in the input layer of the network and the number of classes in the fully connected layer before the classification layer each image is 28 by 28 by 1 pixels and there are 10 classes

create simple deep learning neural network for classification - Jun 13 2023

web this example shows how to create and train a simple convolutional neural network for deep learning classification convolutional neural networks are essential tools for deep learning and are especially suited for image recognition load and explore image data

train deep learning network to classify new images - Apr 11 2023

web pretrained image classification networks have been trained on over a million images and can classify images into 1000 object categories such as keyboard coffee mug pencil and many animals the networks have learned rich feature representations for

matlab code for image classification github - Dec 07 2022

web this repo contains several matlab programs which can be used for building convolutional neural networks for image classification the included code contains several features handling imbalanced datasets via weighted bagging bootstrap aggregation k fold cross validation hyperparameter optimization finding poorly predicted instances

neural network classification for images file exchange matlab - May 12 2023

web oct 15 2020 this is a sample code for neural network classifier for images demonstration of a neural network classification algorithm for images the test has been done on the indiana pines dataset which is freely available the code is provided as is with no warranty

neural network model for classification matlab mathworks - Jul 02 2022

web a classificationneuralnetwork object is a trained feedforward and fully connected neural network for classification the first fully connected layer of the neural network has a connection from the network input predictor data x and each subsequent layer has a connection from the previous layer

convolutional neural network cnn 7 layers image classification - Feb 26 2022

web show more this example shows how to create and train a simple convolutional neural network for deep learning classification convolutional neural networks are essential tools for deep learning

matlab deep learning github - Nov 06 2022

web pinned matlab deep learning model hub public discover pretrained models for deep learning in matlab matlab 326 74 image classification in matlab using tensorflow public this example shows how to call a tensorflow model from matlab using co execution with python matlab 41 17 image classification in matlab

matlab code for convolutional neural networks - Jan 28 2022

web nov 18 2017 i am using matlab to train a convolutional neural network to do a two class image classification problem i have an imbalanced data set 1800 images minority class 5000 images majority class as i understand it the spliteachlabel function will split the data into a train set and a test set

using neural network for classification in matlab stack overflow - Mar 30 2022

web may 27 2014 1 answer sorted by 1 did you checked the neural network toolbox of matlab already mathworks co uk help nnet examples crab classification html prodcode nn language en there you can find some examples how to work with neural networks regarding your two specific questions

neural network for image classification on matlab youtube - Jun 01 2022

web apr 29 2020 neural network for image classification on matlab we will use the deep learning toolbox to make a neural network for image classification on matlab the dataset used on this video can be found

image category classification using deep learning - Mar 10 2023

web overview a convolutional neural network cnn is a powerful machine learning technique from the field of deep learning
cnns are trained using large collections of diverse images from these large collections cnns can learn rich feature
representations for
