Interdisciplinary and Transdisciplinary Failures Dena Fam, Michael O'Rourke, 2020-11-01. Unlike other volumes in the current literature, this book provides insight for interdisciplinary and transdisciplinary researchers and practitioners on what doesn't work. Documenting detailed case studies of project failure matters not only as an illustration of experienced challenges but also as projects do not always follow step by step protocols of preconceived and theorised processes. Bookended by a framing introduction by the editors and a conclusion written by Julie Thompson Klein, each chapter ends with a reflexive section that synthesizes lessons learned and key take away points for the reader. Drawing on a wide range of international case studies and with a strong environmental thread throughout, the book reveals a range of failure scenarios for interdisciplinary and transdisciplinary projects including Projects that did not get off the ground, Projects that did not have the correct personnel for specified objectives, Projects that did not reach their original objectives but met other objectives, Projects that failed to anticipate important differences among collaborators. Illustrating causal links in real life projects, this volume will be of significant relevance to scholars and practitioners looking to overcome the challenges of conducting interdisciplinary and transdisciplinary research.
