Viva, 2019-05-21 *Essentials of Medical Physiology* K Sembulingam, Prema Sembulingam, 2012-09-30 *Research Supervision for Supervisors and Their Students: 2nd Edition* Dan Remenyi, Arthur Money, 2012-03-01 Research degrees remain a challenge for both supervisors and the researchers whom they are trying to help. It is more challenging than ever to find a good doctoral programme and it is difficult to manage all the different facets of a research degree that have to be attended to. Not everyone who thinks it is a good idea to undertake a research degree will be successful and this book indicates the characteristics which are required to produce high quality academic research. The book explores a number of important issues including the nature of theory development in academic research and how positivist and interpretivist research functions. The book discusses in detail how masters and doctoral degrees are evaluated and gives tips on how to be sure that the examiners will be satisfied with both the dissertation and during the viva. This book offers sound advice to both supervisors and their students as to how to navigate their way through all the issues they have to face. In its second edition the book not only addresses the issues which have either changed or have developed since the first edition but it also contains additional material which the authors believe will be a direct help to supervisors and their students. **Community**

Helmholtz and the Conservation of Energy Kenneth L. Caneva,2021-08-03

An examination of the sources Helmholtz drew upon for his formulation of the conservation of energy and the impact of his work on nineteenth century physics In 1847 Herman Helmholtz arguably the most important German physicist of the nineteenth century published his formulation of what became known as the conservation of energy unarguably the most important single development in physics of that century transforming what had been a conglomeration of separate topics into a coherent field unified by the concept of energy In Helmholtz and the Conservation of Energy Kenneth Caneva offers a detailed account of Helmholtz s work on the subject the sources that he drew upon the varying responses to his work from scientists of the era and the impact on physics as a

discipline Caneva describes the set of abiding concerns that prompted Helmholtz's work including his rejection of the idea of a work performing vital force and investigates Helmholtz's relationship to both an older generation of physicists and an emerging community of reformist physiologists. He analyzes Helmholtz's indebtedness to Johannes Müller and Justus Liebig and discusses Helmholtz's tense and ambivalent relationship to the work of Robert Mayer who had earlier proposed the uncreatability, indestructibility and transformability of force. Caneva examines Helmholtz's continued engagement with the subject, his role in the acceptance of the conservation of energy as the central principle of physics and the eventual incorporation of the principle in textbooks as established science.

Staging Brazil Ana Paula Hofling, 2019-06-04. Winner of Oscar G. Brockett Book Prize for Dance Research given by DSA 2021. *Staging Brazil: Choreographies of Capoeira* is the first in-depth study of the processes of legitimization and globalization of capoeira, the Afro-Brazilian combat game practiced today throughout the world. Ana Paula Hofling contextualizes the emergence of the two main styles of capoeira, Angola and Regional, within discourses of race and nation in mid-twentieth-century Brazil. This history of capoeira's corporeality on the page and on the stage includes analysis of illustrated capoeira manuals and reveals the mutual influences between capoeira practitioners, tourism bureaucrats, intellectuals, artists and directors of folkloric ensembles. *Staging Brazil* sheds light on the importance of capoeira in folkloric shows in the 1960s and 70s, both those that catered to tourists visiting Brazil and those that toured abroad and introduced capoeira to the world.
