BRIEF EXERCISE 5.1

- (a) The statement of financial position provides information about a company's liquidity, solvency, and financial structure. If Wong has poor liquidity, or poor coverage and solvency, or if Wong is financed heavily by debt, lending funds to (and investing in) the company has more risk.**
- (b) The statement of cash flows provides information about the company's sources and uses of cash during the period. If Wong relies significantly on external financing as a result of negative cash flows from operations, lending funds to (and investing in) the company has more risk. The statement of cash flows also helps users assess earnings quality. For example, if Wong's net income is significantly higher than cash flows from operations, this is a sign of poor earnings quality, and a potential cause for concern to a possible lender to the company.**
